Re: Opposition to the Phillips 66 Rail Terminal Project

Dear Mr. Wilson,
I am writing to request that you do not permit Phillips Oil to expand their facility at the Nipomo (also known as the Santa Maria facility). We already have a significant pollution problem on the Mesa which we do not yet have under control, and the addition of five trains a week, to and fro, each one of which would have 80 cars would add significantly to noise, air and visual pollution.

DYM-01

In addition 520 trains a year, traveling through SLO County will increase the probability of an accident, which, if it occurs in a densely populated area such as the Cal. Poly campus, would be a disaster for a large number of families and the future of SLO County. This County has a reputation for beauty and nature that has taken generations to maintain - which would be destroyed by one "medium" accident. It would then take years to recover from the physical damage and the psychological issues.

So, once again, please do not allow this project to continue.

Sincerely

Michael R. Dyer

Re: Opposition to the Phillips 66 Rail Terminal Project

Dear Mr. Wilson,

I am writing to request that you do not permit Phillips Oil to expand their facility at the Nipomo (also known as the Santa Maria facility). We already have a significant pollution problem on the Mesa which we do not yet have a [illegible] and the addition of [illegible] trains [illegible] to [illegible] of which [illegible] significantly [illegible] and [illegible].

In addition 520 trains a year traveling through SLO County will increase the probability of an accident. Which, if it occurs in a densely populated area such as the Cal. Poly campus, would be a disaster for a large number of families and the future of SLO County. This County has a reputation for beauty and nature that has taken generations to maintain - which would be destroyed by one "mechanic" accident. It would then take years to recover from the physical damage and the psychological issues.

So, once again, please do not allow this project to continue.

Sincerely

Michael R. Oyer
