Dear Murry Wilson,

I would like you to strongly consider rejecting the Phillips 66 Santa Maria oil train proposal. Crude oil trans threaten the safety of families along rail routes and create toxic air pollution. Oil ~~trans~~ trains threaten California's water supplies. As you know, California is currently in a drought so it would not be wise to allow oil trains. Please don't allow this injustice to be committed. It is very hazardous to the environment and by extension, hazardous to Californians. Support people's health by rejecting the Phillips 66 Santa Maria Oil train proposal

FLY-01

Sincerely,

Yanira Flores
