Subject: Phillips 66 rail spur - STOP the Expansion now

Mr. Murry, SLO COUNTY PLANNING DEPARTMENT
P66-railspur-comments@co.slo.ca.us

I considered Phillips 66 a good neighbor for many years. In fact, I was one of the few people in my neighborhood that defended them when people expressed concern over the flares, the smell or the view of the stacks. The management team for their company came to Trilogy and held holiday parties, gave us access to walk on the property with a wildflower specialist, and sent newsletters out on their accomplishments. They even invited us to tour their facility about one year ago in which the focus was on their "safe" operations. I participated in all of these events and felt that Phillips 66 management team was committed to the quality of life in our area and as concerned about the environmental impact of their operations as we were.

But since learning more about the rail proposal, my viewpoint has changed. I believe that their corporate strategy has changed. In a rush to become more profitable they are overlooking their commitment to the local environment, the community in which they are a part of and the impact that their rail project will have on all of the Central Coast. In my opinion, as good neighbors, they should be thinking of the global long term results and not just the short term profits. LOM-01

I am saddened with what I believe is a broken promise. We do not want to close down the facility nor do we want people to lose their jobs, what we want is a safe, crude oil processing plant that uses the existing pipelines and does not bring in railcars or trucks for processing. We would like to work together on ensuring that they continue to operate for many years, but without the crude-by- rail strategy.

The bottom line is that their current proposal is unsafe, untimely and has too many flaws for our support. Please stop this project now.

Thank you.
