Subject: Rail Spur Comments

Attention : Mr. Murry Wilson SLO County Planning Department

In reference to the Phillips 66 company putting in another rail spur and increasing their oil operation in SLO county...This project is very bad for San Luis Obispo County as it affects all of the County, not just the Mesa or Trilogy. We bought here about a year and a half ago thinking this was going to be our place to live, with ocean air and clean climate without smog. Now we are finding that we not only may have to put up with five hundred oil trains coming through the County each year each being 1.5 miles long , along with air pollution and light pollution plus the potential for oil spills and fires but the pollution that has already occurred is worse then Southern California.

This is very frightening since my wife has Asthma and this is a condition that could be very dangerous for her, and Im sure there are many people in our community with the same conditions. SCT-01

Please while you are debating this issue would you please take into consideration the preceding points and not let the conditions and environments and the property values go down in this beautiful County.

The safety and well being of our citizens trumps the new direction in which Phillips intends to take us all...Thats why our planning commissioners must vote NO PROJECT.

Sincerely
Ted Scruggs
1354 Trail View Place
Nipomo, Ca. 93444
