Dear Mr. Murry Wilson,

This week we went to a meeting about the Phillips 66 proposed rail spur and terminal project. We were horrified by the information we weregiven. ANC-01

This project must be stopped or it will:

1. Ruin our way of life here in Nipomo and the county of SLO.
2. The air will be more polluted from the diesel engines of trains and related activities. ANC-02
3. The county encouraged new construction on the Mesa and those jobs will be lost. The hotel and related services will not go forward @ Trilogy. The Trilogy business park has been approved. They aren't materialize. ANC-03

Now, what would happen if there's an accident when the trains come over Cuesta Grade?

1. It would be a cataclismic event.
2. 63,000 people in SLO would have to be evacuated if the bridge, built in the 1890s failed and there was a spill. ANC-04
3. This is a vacation area and an accident would destroy and polute the surrounding area.

4. Businesses would have to relocate. No new business would emerge for many years or decades.
5. People would not send their children to Cal Poly. That rail line goes through the campus!
6. The rich agricultural area would be destroyed.
7. The area would be forever impacted in so many, many ways.

ANC-04 cont

The main reason we moved to Trilogy a year ago was to get away from the polution in the Fresno area. I am so sad to realize that Phillips 66 is going to make things so much worse if their proposal goes through.

Won't you please join with us, stand strong, and reject the Phillips 66 proposal once and for all.

It's the right thing to do for all the citizens of SLO County.

ANC-05

Sincerely,

Carmen Anderson
