To Murry Wilson, SLO County Dept. of Planning and Building

As a resident of Santa Barbara County, I am deeply opposed to the proposed oil by rail project at the Phillips 66 Santa Maria Refinery. My objection to this proposal comes from three concerns:

1) The safety of residents ~~along~~ living along the rail routes is questionable. There is a huge potential ~~for~~ risk for environmental ~~hazard~~ disaster if a hazard occurs along the train route. ANON-01

2) People that live close to the rail route will feel the environmental health effects of ~~air pot~~ increased air pollution. ANON-02

3) There is also a potential risk for water contamination if an oil spill occurs near a natural source of water in California. ANON-03

This project will produce a high number of negative externalities that could negatively affect the economy of California. That is why I am asking you to reassess the impact that the Phillips 66 project will have on our local environment. ANON-04

Respectfully Yours,
