Nov. 23, 2014

Dear Murry Wilson,

I have very deep concerns about the P66 Rail Terminal Project and am opposed to it.-

My concerns are many.- The environmental impact is too great for our fragile Earth ~~can~~ to absorb. The possible air quality is more than serious.- The possible streams that could be forever fouled by a spill.

My concern about passing this step that will then be forever in place; the snowballing effect of increase of use of toxic materials - increase of oil refineries locally is a picture of the future that is damaging to the air, water, soil, plants, animals & people -

Please stop this process before it expands.

Yours Truly

Jean Edwards
