Dear Mr. ~~Muvvy~~ Wilson,

As a student of Cal Poly and a resident of San Luis Obispo, the prospect of using the local railroad to transfer toxic tar sand is very alarming. This would be toxic to our community and put thousands of on and off campus students in danager if an accident were to occur. It is also a public health issue as ~~[illegible]~~ toxic particles are cancer causing and effects members of our community.

Since this rail travels all throughout California and this decision is being made in SLO, we must be responsible and not allow a tragedy of the commons.

HEH-0
