732 Embarcadero del Norte, Goleta, CA 93117

Dear Mr. Wilson,

My name is Theo Cerruesne and I am a student at UC Santa Barbara and am writing to urge you to reject the Phillips 66 heavy oil refinery. Trains bringing crude oil by rail to the refinery would pass by my community and beautiful coastline posing an enormous threat to my friends and community and home. Trains carrying this oil go straight through downtown Santa Barbara and have been known to explode. Rejecting the Phillips 66 refinery would ensure these trains don't put my community at risk. Furthermore, climate change poses the greatest threat our species has ever known. More oil refining will only exacerbate this problem further. PLEASE REJECT THE PHILLIPS 66 REFINERY!

Yours Sincerely,

Theo Cerruesne,

LET-01
