To the planning comission:

I would like to express my deep concern for the welfare of the people of Santa Margarita, concerning the Quarry and wanting to use Hwy 58 for their many trucks taking the rocks out. We already have Mike Coles, which is enough. I do believe they should find another road into the Quarry up for question now. 200 more trucks a day!!! is crazy for a Hwy. I can not believe the EIR report could approve such a hindrance to the neighbors, + School to pass by + huge maintaince on the Road itself. Then if the Margarita parcels get sold, will have all of their traffic. Please do not OK this project.

Issue #2 -

I have written my Congressman about the huge amount of vineyards in our County (& State) which are taking our precious water supply — and they have greatly reduced the water table. Please please put a Moritorium on any more to be planted. We do have plenty for revenue. We need also to grow food plants.

Thank You for listening to me
