Dear Mr. Murry Wilson, SLO County Planning Dept.:

I live far away from the Mesa but these oil trains that are coming thru our county will be traveling close to where I live. I am very concerned about possible derailments occurring in downtown Paso Robles where the train tracks run. There is a history of such derailments occurring in populated areas with concurrent fatalities. This risk is too high to be acceptable ~~for~~ our community and hope you will reconsider this project & recommend against it.

I understand we do not have a Haz mat team quickly available to effectively deal with this explosive and dangerous cargo. This is toxic my other reason to recommend against it.

Respectively, Adelle Orton
