Dear Mr. Wilson

I am writing to you today as a concerned university student who is working in the environmental field. The transportation of this dangerous and toxic substance should not be expanded. The potential harm it will do to countless communities and eco-systems greatly outweighs any proposed benefit. People are organizing around this issue in opposition to it throughout California. As a citizen who cares deeply about the future of this state, I urge you to not support this project. This is not the direction we should head it. Support and listen to the people who do not want to suffer from the harm this will bring. VAU-01

With thanks,
Unique Vance
