Dear Mr. Wilson

I am a student at University of California, Santa Barbara, and I'd like to express my concern on the proposed oil rail project at the Phillips 66 Santa Maria Refinery. I don't think any emergency responders in the area would be prepared for a train wreck if that happened. And that risk is on top of the pollution the transportation of the canadian tarsands. As the environmental science degree was first created here at UCSB after the coastal oil spill, I implore you not to support this rail project. Santa Barbara doesnt need another oil spill, and SLO certainly doesnt either. In fact its insane to put that risk on any peoples any where. FRN-01

Please reject the Phillips 66 proposal to protect the peoples and environment along the rail route.

Respectfully,

Nicholas Frey
UCSB ES and CS2xmajor
