Comment: I have a question concerning the construction of the Las Pilitas Quarry Project. If the water taken downstream in the Salinas River should deplete the water from our well upstream on Parkhill Rd., who will be responsible for the loss of water? What gaurantee do we have from the county that this will not cause our well to go dry? Will the owner of the well be responsible?

Our water resource will not support 20,000 gallons of use per day for dust control at the quarry. Most wells in our area are producing a minimal amount of water at the present time, one to 10 gallons/minute.
