City, State, Zip Code:* San Luis Obispo, CA 93401-4030

Telephone Number:* (805) 546-0672

Email:* jimmillenaar@gmail.com

Comment: As a very frequent bicycle rider (1-2 times/wk) on 58-Parkhill-Pozo Roads I'd like to know what mitigation will be for spilled aggregate & sand on the already non existant shoulders of the road for us? Frequency? Cleanup? How long till Class 2 or 3 bike lanes are built? Visibility of us on the S.M. Cemetary hill portion of the road for West bound traffic is very bad 2x/yr late feb - early april and again late sept. through early nov. I think, when the sun is low in the sky & directly in your eyes as a motorist. I'm not fond of breathing dust (especially valley fever or asbestos) or diesel exhaust while riding! Bridge between Pozo Rd. & Cemetary is inadequate width.
This project will create a very visible & ugly scar in the viewshed. Rather see existing quarries enlarged.
I believe this project when compared to other quarries in CA of similar size will use far more water than they claim in the EIR to process aggregate and do dust control.
In the face of global warming, how stable is our water supply if long term droughts become the norm?
