PLANNING AND BUILDING DEPARTMENT

Comment Form

Oster (Las Pilitas Quarry) CUP / Reclamation Plan (DRC2009-00025)

Date: 7-22-2010

Name*: Marilou Bowie

Affiliation (*if any*):* Long time concerned resident

Address:* 3575 Park Hill Rd

City, State, Zip Code:* Santa Margarita, Calif 93453

Telephone Number:* 805 438 5491

Email:*

Comment: See attached

There was not sufficient information made known and available to Santa Margarita residents. Lots of people in outlying areas that this proposed aggregate Quarry will adversely affect are totally unaware of it. I feel everyone in the large affected area have to be educated about the impact that will happed to upend their peaceful lives, they should have a voice and deserve to.

**Please print - Your name, address, and comments become public information and may be released to interested parties if requested.*

Please either deposit this sheet at the sign-in table before you leave today, or fold, stamp, and mail. Insert additional sheets if needed. Comments must be received by August 3, 2010. Comments may also be faxed to (805) 788-2413 or emailed to joliveira@co.slo.ca.us.

Jeff Oliveira, Environmental Resource Specialist
County Planning & Building Department
976 Osos Street, Room 300
San Luis Obispo, CA 93408

To: SLO Planning and Bldg. Dept.
Attention: Jeff Oliveira

The operation of the proposed Aggregate Quarry on Hwy. 58 will cause serious damage for the area traffic not just within a 3 mile radius. Autos and school buses will have to travel through this area two times a day or more from outlying residential dwellings as far as 17 miles away. This is the only route they can use to get to school/work. Serious auto and bus traffic accidents are bound to happen to innocent people. I think one quarry established a long time ago is definitely enough. The town of Santa Margarita and vast quantity of outlying residential dwellings have grown substantially.
The blasting will horribly destroy the local flora and fauna , just as the gulf oil spill has destroyed everything in it's path. There is barely enough water available to support residents and to keep flora and fauna alive. The amount of water that the quarry requires will definitely deplete the area, making it difficult for survival of the resident people and animals.

Respectfully,

Marilou Bowie
