Hi John - please include Mr Sager's comments and concerns in the Oster scoping process.
Thanks, Amy

Dear Sir, this is a bad idea from the start, to much of our water will be used for this project. Most of the wells here on Park Hill Rd. are under 5 gallons a minute as of now. If this project is allowed to go forward the potential for draining our water supply is far to great.
If that were to happen it would essentially make my property worthless. I really would like to think that common sense will prevail and stop this project in its tracks.
Steve Sager Park hill resident and very against this project
