IMMEDIATE Reporting of Laboratory-Confirmed Cases of COVID-19 Required

Effective today, the County of San Luis Obispo Public Health Department is requiring that providers immediately report all newly identified laboratory-confirmed cases of COVID-19 for individuals residing in San Luis Obispo County. This is a needed step given that delays in reporting are causing significant difficulties with contact tracing.

Clinicians must report a positive test result immediately by calling the County of San Luis Obispo Public Health Department at **(805)781-4902** or via fax at **(805)781-5543**. In addition, clinicians must complete a Confidential Morbidity Report (CMR Form A) and transmit the CMR to the Public Health Department by one of three ways:

- Via Fax at (805)781-5543
- Via Phone at (805)781-4902
- Through CalREDIE:

<https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/CalREDIE.aspx>

To find CMR Form A, and detailed information regarding required disease reporting, please refer to the "Disease Reporting for Healthcare Providers and Laboratories" page on the County of San Luis Obispo Public Health Website:

<https://www.slocounty.ca.gov/Departments/Health-Agency/Public-Health/All-Public-Health-Services/Disease-Reporting-for-Healthcare-Providers-and-Lab.aspx>
