

TO: Los Osos Basin Management Committee

FROM: Rob Miller, Interim Executive Director

DATE: October 8, 2018

SUBJECT: October/November Meeting Schedule Update

Staff has been preparing for the October 2018 BMC meeting. In reviewing the status of the various draft agenda items, it appears that the meeting should be deferred until November 2018. Item status is described below.

1. Basin Infrastructure Program: LOCSD will be considering a test well for Program C at Site A (Middle School) during its November 1st regular meeting, so a status update will not be available until after that date. The Cuesta By Sea monitoring well remains in the Minor Use Permit process through San Luis Obispo County, so no additional action is necessary at this time.
2. Storm water recovery and creek discharge: Staff is discussing our approach with potential funding and partner entities and coordinating with County staff as part of the Storm Water Resource Plan. Additional BMC actions are not needed in October.
3. Initial feedback from the fall 2018 groundwater monitoring event will not be available until November.
4. CHG report on metric trends review: No comments have been received from BMC members, so staff plans to provide additional time for Directors to review the document.
5. Water conservation update: No additional BMC actions are planned for the October meeting.

Please let me know if you have any questions, and we will make arrangements for a meeting on Wednesday, November 14, 2018. Staff considered the third Wednesday of November, but this date falls on the day before the Thanksgiving holiday, making public participation more difficult. Please let me know if you have any questions or comments.
