Pending the Cooperative Committee's recommendation on May 22, 2019, the Draft GSP Chapter 12 will be distributed to the four Paso Robles Subbasin GSAs to receive and file.

Paso Robles Subbasin Groundwater Sustainability Plan Chapter 12 Interagency Agreements

Prepared for the Paso Robles Subbasin Cooperative Committee and the Groundwater Sustainability Agencies

May 15, 2019

12 MEMORANDUM OF AGREEMENT

The GSAs will operate under the existing MOA until DWR approves the GSP. The existing MOA is included in Appendix K. During DWR's review process, the GSAs will consider developing a refined governance structure to implement the GSP. The governance structure would be established in a new agreement between the GSAs. The agreement would outline details and responsibilities for GSP administration among the participating entities, and may include provisions to establish a new governing body to oversee GSP implementation.
