#### How to send encrypted emails

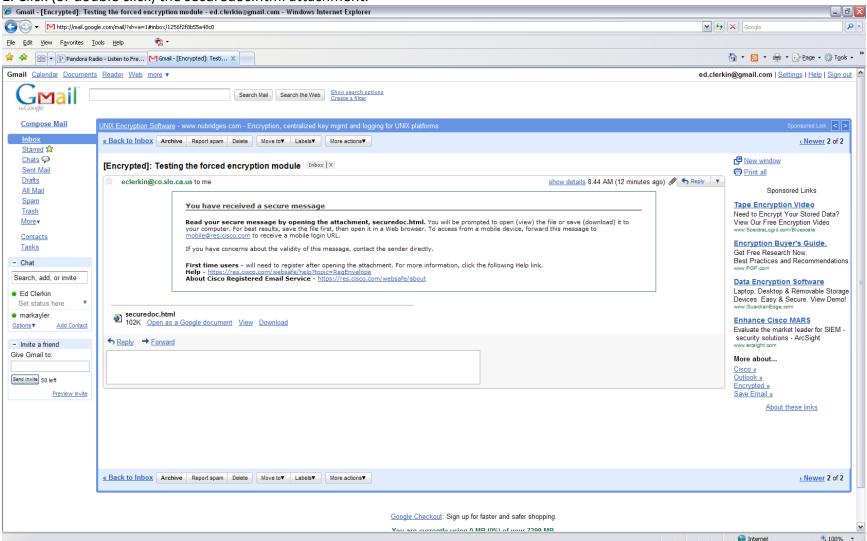

1. Place a # tag at the beginning of the subject line.

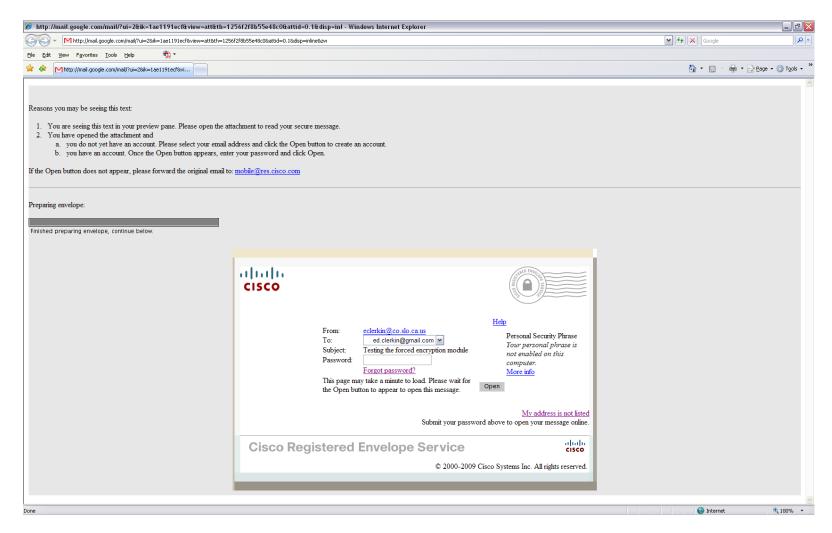

- 2. Enter externail email adresses (internal County emails will not be encrypted). External emails have @ symbol in them.
- 3. Send the email.

#### Receiving an encrypted email

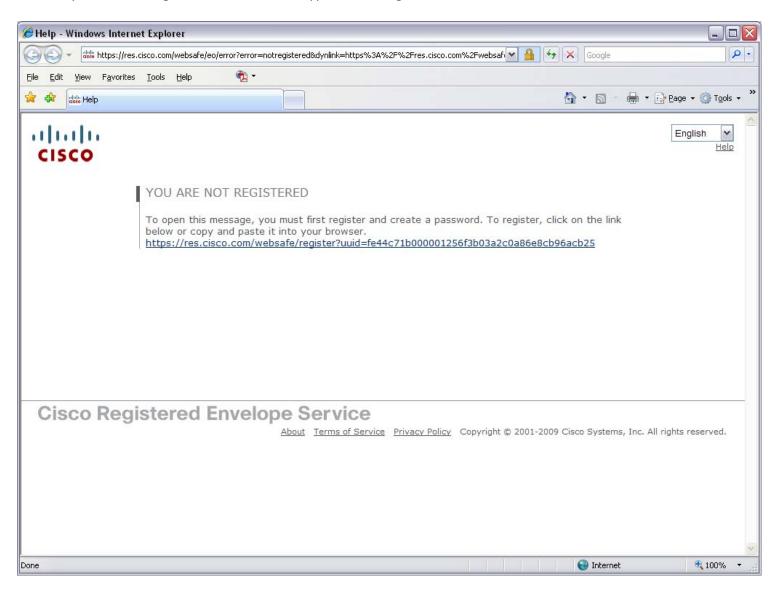

1. Click (or double click) the securedoc.html attachment.

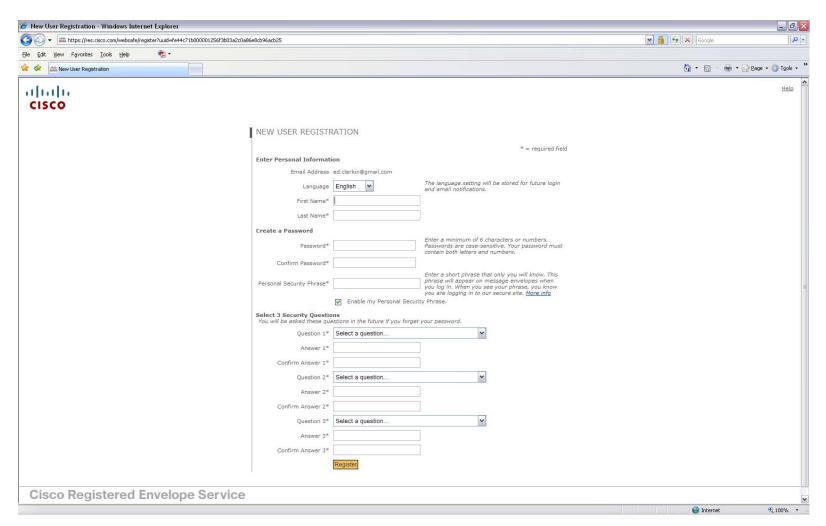

2. In this web page, my email account was not recognized by the encryption tool so it issued a message that I need to register. Select the "To" email account from the dropdown box and click the Open button.

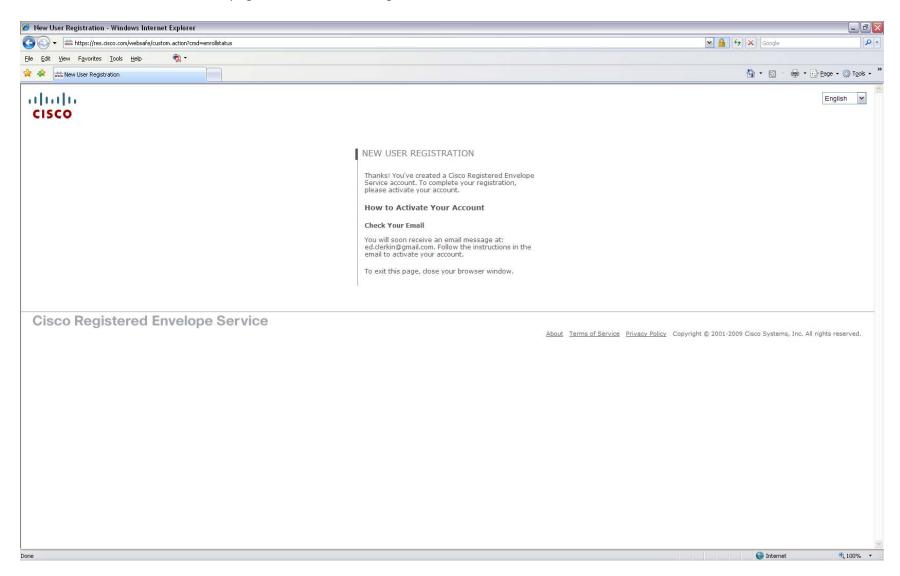

3. Since you are not registered, click on the hyperlink to register the selected email account.

4. Fill-in the required information and then click the Register button.

5. You should then see this web page after successful Registration.

Go to your inbox for your external email account and open the CRES email for activating your new account. Once you click the hyperlink to activate your account, you will see this web page:
