

## How to Access CASQA Stormwater Training Videos

Go to <https://www.casqa.org/>

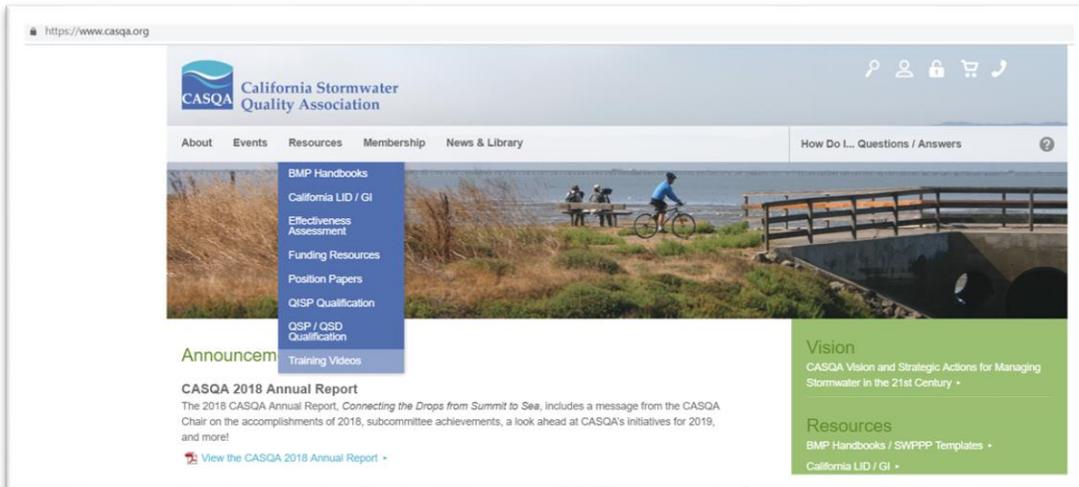

-If you have a login and password, enter them to login as a CASQA member.

-Videos must be streamed from the CASQA site- we don't have the option to download and save them.

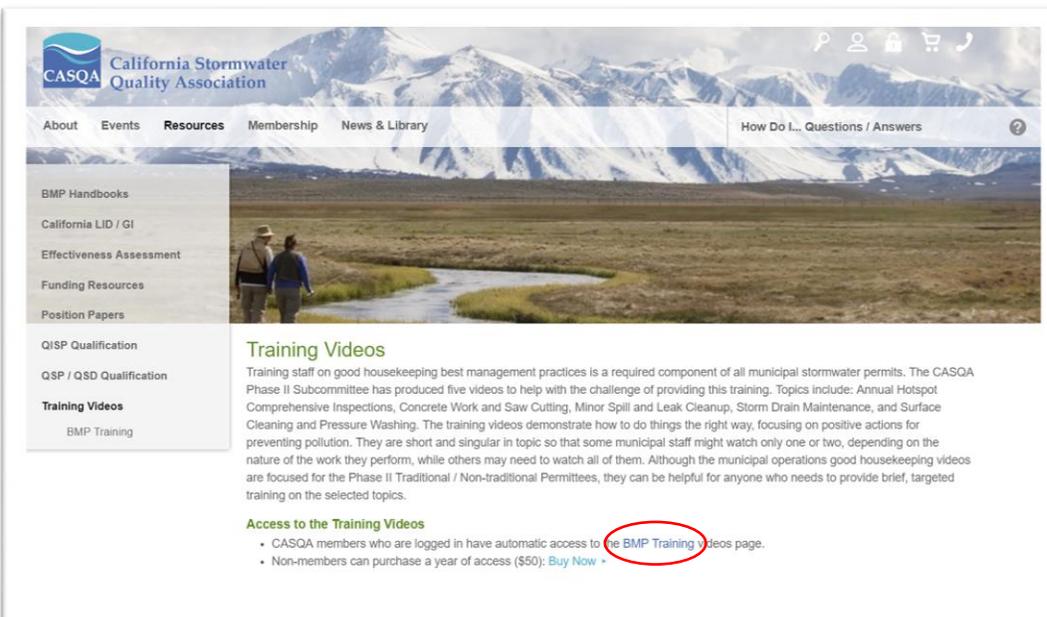

-If you need a login email Ann ([agillespie@co.slo.ca.us](mailto:agillespie@co.slo.ca.us))

Once logged in, scroll over the 'Resources' tab to open the drop-down menu.

Click on 'Training Videos' at the bottom.

On the next page, click through to the BMP Training Videos:

# How to Access CASQA Stormwater Training Videos

The page with the videos available for streaming will open.

The screenshot shows the CASQA website interface. At the top left is the CASQA logo and the text "California Stormwater Quality Association". A navigation bar includes "About", "Events", "Resources", "Membership", "News & Library", and "How Do I... Questions / Answers". A sidebar on the left lists various resources, with "Training Videos" and "BMP Training" highlighted. The main content area features a "BMP Training" section with a "Municipal" sub-section. Below this are two video player thumbnails. The first video is titled "Annual Hotspot Comprehensive Inspection" and shows a clipboard with a "TO DO LIST HOUSEKEEPING" where "Annual Hotspot comprehensive inspection" is checked. The second video is titled "Concrete Work and Saw Cutting" and shows a similar clipboard with "Concrete work and saw cutting" checked. Both video players include a play button, a progress bar, and the CASQA logo.

## BMP Training

### Municipal

Training staff on good housekeeping best management practices is a required component of all municipal stormwater permits. The CASQA Phase II Subcommittee has produced videos to help with the challenge of providing this training. A list of critical targeted training topics was developed and the top five were selected for production in 2018. The training videos demonstrate how to do things the right way, focusing on positive actions for preventing pollution. They are short and singular in topic so that some municipal staff might watch only one or two, depending on the nature of the work they perform, while others may need to watch all of them. Although the municipal operations good housekeeping videos are focused for the Phase II Traditional / Non-traditional Permittees, they can be helpful for anyone who needs to provide brief, targeted training on the selected topics.
