Appropriations Limit Worksheet Notes to Worksheet For the Fiscal Year Ended June 30, 2011

Note 1: **Per Capita Personal Income Factor**

The per capita personal income factor was obtained by using the percentage factor from the State Department of Finance letter dated May 2010. The CPI change was -2.54 percent. This factor is converted to a ratio and for calculation purposes was 0.97460000.

Note 2: **Population Changes**

There are three methods of calculating the change in population that a county may choose in determining the Gann Limit. 1) The change in population within its jurisdiction; 2) The change in population within its jurisdiction, combined with the changes in population within all counties having borders that are contiguous to that county; 3) The change in population within the incorporated portion of the county. The county may use either of these methods in any year.

The County has elected to use the county-wide method (1). Per the May 2010 letter from the State Department of Finance, the county-wide area population change percentage was 0.87. This percentage change was converted to a ratio factor of 1.00870000.
