

## Explanation of Change in Ballots Counted 11/17/10 at 3:00 p.m.

As part of the official canvass, all provisional envelopes that have been marked for count and do not count are reviewed to ensure that all ballots with envelopes marked for counting have been removed and counted.

On 11/17, 48 provisional ballot envelopes were discovered that had been marked as count but had not had the ballots removed for counting. These ballots were counted and are included in the unofficial results posted on 11/17. Among these were 27 ballots for the City of San Luis Obispo and 21 ballots for the City of Morro Bay.

In addition, the ballots from 4 precincts had to be recounted since the number of voters signing the roster did not equal the number of ballots counted on election night. After research it was discovered that the number of ballots counted on election night was incorrect. This accounted for a net change of 2 ballots. These combined with the provisional ballots equal the net change of 50 ballots from the 11/16 count.
