DAIRY CREEK GOLF COURSE'S TENTH ANNIVERSARY PARTY

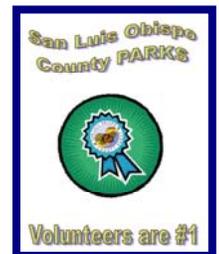

Dairy Creek Golf Course celebrated the tenth anniversary of its opening in March 1997. This year's celebration on Saturday, March 24th had approximately 200 participants who paid only 50% of the current green fees for the day. The celebration included free skill clinics with the Central Coast Golf Academy, "Ten Minute Tune-ups," free computerized swing analysis, golf club fitting and a personalized golf swing photo.

Fairways Restaurant at Dairy Creek provided a BBQ buffet during lunch hours. The celebration was a casual, fun day for all golfers to take advantage of spring weather and a wonderful links style golf course.

For more information about Dairy Creek or other San Luis Obispo County Parks' golf facilities, visit www.slocountyparks.org or call 805-781-5930.

VOLUNTEER APPRECIATION BBQ

On May 17, 2007, San Luis Obispo County Parks will honor the hard working volunteers who have provided their time and efforts to help keep our park facilities beautiful and successful operations. The first annual BBQ reinforces our commitment to volunteerism and is a small way to say "thank you" to our volunteers for their contributions to our programs and services. The Volunteer Appreciation BBQ will include a Santa Maria style BBQ with refreshments, dessert, and a raffle for all participants. Furthermore, the County's key volunteers will be specially recognized. County Parks currently logs over 50,000 volunteer hours per year and is truly fortunate to have so many dedicated individuals improving the quality of life for the community and visitors to San Luis Obispo County parks.

RECREATION PROGRAMS

YOGA AT THE SLO VETERANS HALL

Mondays & Wednesday
 Beginners: 5:15pm – 6:15pm
 Continuing: 6:30pm - 7:45pm,
 (All levels welcome)
 Info: Instructor Shoosh at 772-3560

DOG OBEDIENCE AT EL CHORRO PARK

Wednesay Evenings
 Session 5: 5/23 – 6/13, 5:30 – 6:30pm
 Session 6: 7/18 – 8/8, 5:30 – 6:30pm
 Session 7: 8/15 – 9/15, 5:30 – 6:30pm
 Info: Instructor Janet Neumann 610-1157

CAYUCOS BEACH JUNIOR LIFEGUARD PROGRAM

Mondays - Fridays, 9:00am – 2:00pm
 Session 1: June 25 – July 13 (no class 7/4)
 Session 2: July 23 – August 10
 Registration begins Monday, April 30
 Info: Amanda or Steve 781-5930

MONSTER SKATE SERIES CONTEST

Saturday Event Dates, 10:00am – 3:00pm
 May 5: San Luis Obispo Skate Park
 May 19: Grover Beach Skate Park
 June 2: Los Osos Skate Park (Final Contest)
 Info: www.ccmonsterskate.com

ARGENTINE TANGO AT THE SLO VETS HALL

Mondays 8:00pm – 10:00pm, \$4/class
 Info: Rich 783-0596 or www.slotango.org

TENNIS LESSONS AT NIPOMO COMMUNITY PARK

Tuesdays & Fridays
 Beginning to Advanced levels.
 Info: Instructor Davide Masica at 458-4008

SAN LUIS OBISPO COUNTY PARKS LAUNCHES MENTORING PROGRAM

There is no more important “final” task for the Parks management staff to undertake than developing an effective Succession Planning program. Pivotal to that program is the Mentoring Program.

Phase I of County Parks Mentoring Program will enhance succession planning for those who are so inclined. Phase I includes participation in the program at the management level with the message to staff being, **“Expect change and prepare for it!”**

In order to increase the chances for individuals who are interested in upward mobility County Parks has created a Mentoring Program that will enhance staff chances for success, educate them on the duties management performs, give insight, and prepare staff for the future.

Program implementation includes identifying core competencies.

What are competencies? Standard intelligence tests are not good predictors of job success. Job competency has a different meaning. It can be an underlying characteristic of an employee, (i.e. motive trait, skill, self image, social role and knowledge) that results in effective and /or superior performance on the job. Identifying competencies can help clarify the differences between outstanding and average performers, an important issue in a competitive business environment. Candidates for this program will be evaluated for the following core competencies:

- Must be able to communicate effectively
- Ability to get along well with others and work effectively in a group
- Desire to motivate staff and enhance the quality of life for patrons and staff (sphere of influence)
- Critical thinker and desire to work outside normal parameters
- Ability to analyze difficult situations and make executive decisions
- Is comfortable in a leadership role, is self motivated, and can effectively direct others

In addition to core competencies the following values are important.

- Exemplary work ethic
- Desires to do the right thing, and encourages fair play
- Recognizes the need for personal balance in family, work and individual

In the past, the transition of leadership was gradual. Greater continuity was ensured as only one or two key employees might leave in any given year. However, now County Parks is experiencing very short time periods as a generation of baby-boomers reaches retirement age.

This program is all about building those “strong leadership skills” to ensure that the next generation of County Parks’ leadership is able to effectively plan, execute, network, advocate, and generally sell the mission of parks and recreation to our diverse community and key decision makers. Participants will benefit from the program by developing core competencies and building skills. Those who do not participate but stay in the profession will benefit from the strong leaders we hope to groom for the future. All of us who will live in this community will benefit from the foundation we are laying today.

This program is all about building those “strong leadership skills” to ensure that the next generation of County Parks’ leadership is able to effectively plan, execute, network, advocate, and generally sell the mission of parks and recreation to our diverse community and key decision makers..

We’re on the Web!

See us at:

www.SLOCountyParks.org

REC ADMIN STUDENTS ORGANIZING BUNCO FUNDRAISER

On Thursday, May 24, 2007 Cal Poly Recreation Administration students, with direction from SLO County Parks, will be hosting a fundraising Bunco Tournament at the SLO Vets Hall. All proceeds will benefit the Susan G. Komen For The Cure foundation. For more information or a registration form please email Stacey King at sking@co.slo.ca.us. The tournament will be limited to 144 participants. The registration fee is \$25 per participant and will be accepted until Tues, May 22. For more info go to www.slocountyparks.org

UPDATE ON CURRENT PROJECTS

Bob Jones Pathway – City of San Luis Obispo to Avila Valley:

Over the last few years, County Parks has been working on an extension of the Bob Jones Pathway between the SLO Land Conservancy Octagon Barn (located on South Higuera in San Luis Obispo) and the County's Ontario Road Staging Area (located in the Avila Valley on Ontario Road). This roughly 5-mile segment would provide an alternative transportation corridor for bicyclists as well as a recreation corridor. At this point, County Parks and the project's consultants (Questa Engineering and the Morro Group, Inc.) are working on a preliminary design and environmental clearances. San Luis Obispo Council of Governments and California Department of Fish and Game have provided grant funds to help complete the project. Since early 2007, County Parks has been meeting with property owners along the route to obtain input. On April 26, 2007, the County's Parks and Recreation Commission will determine a preferred route for the corridor. Although the pathway may still change some over time, this will allow the required environmental studies to be completed. Construction is still a couple of years away. Stay tuned...

Parks and Recreation Element (PRE):

On December 19, 2006, the Board adopted the PRE. The Element became law on January 18, 2007. The final PRE should be available to the public on the County Parks website at www.slocountyparks.org in late April 2007. Hard copies, for a copying fee, will also be available.

Nipomo Park Master Plan:

On March 22, 2007, the County's Parks and Recreation Commission provided direction to Parks staff to finish the environmental document for Nipomo Community Park Master Plan. Once the environmental document is complete, Parks staff will bring it and the Park Master Plan back to the Parks Commission for more public input as well as eventual Master Plan approval. The current Draft Master Plan proposes additional active recreation in the southwest portion of the park, while maintaining the natural area in the remainder of the park.

Restoration along the Salinas River – in San Miguel

The Resource Conservation District and San Luis Obispo County Parks are proposing restoring portions of the Salinas River owned by San Luis Obispo County. Restoration would occur near North River Road and the eastern end of 15th Street in San Miguel. The proposed project would include removing the old swimming pool, planting portions of the corridor with native plants, and providing barriers to off-road vehicles on County property. The project is funded by a Regional Water Quality Control Board grant. The San Miguel Advisory Council will provide input on April 25, 2007.

Rios Caledonia Adobe

This project will repair and preserve the Rios Caledonia Adobe to prevent further deterioration of the structure. The Rios Caledonia Adobe, in San Miguel, was built in about 1846 as a residence for Petronillo Rios. In the 1860's it served as a hotel and stage stop along the old mission trail between San Francisco and Los Angeles, until 1886. Improvements will include seismic retrofitting, repairing the deteriorating outside plaster skin, and improving drainage around the perimeter of the building. Architectural Resources Group has prepared a design for the improvements. Construction documents will soon be underway. Funding for this project has been made available from the Federal Save America's Treasure grant program, and Per Capita Proposition 40 funding. Construction Improvements are planned for summer/fall of 2007.

MORE PROJECT UPDATES

Lopez Lake Boat Facility Improvements

This project will replace the boarding floats at the marina boat launch and the courtesy "F" dock, repave the marina parking lot, and replace two fish cleaning stations. Construction documents have been prepared and are under review. Funding for this project has been made available from the California Department of Boating and Waterway's grant program. Construction improvements are planned for spring of 2007.

Cayucos Accessways Improvements

This project will improve two coastal accessways in Cayucos. The existing accessways are located along Pacific Avenue at 16th and 8th Streets. Improvements at 16th Street will include adding a paved walkway and replacing the stairs. Improvements at 8th Street will include replacing the lower section of stairs. A grant from the Coastal Conservancy, along with Per Capita Proposition 40 funding is making this project possible. Construction work is planned for winter of 2007.

Norma Rose Park Development

This project will develop a park facility in Cayucos. This 1.5 acre park will be located on Ocean Avenue, West of the Cayucos Cemetery and directly East of Highway 1. Park improvements will include a skate park, children's playground, basketball court, rest-room, and picnic areas. Construction documents are being prepared. Construction improvements are pending the County Board of Supervisors approval for construction, and authorization of maintenance funding.

Biddle Park Master Plan

This project will update the existing master plan (1976). Consultants will be looking at protecting natural resources including the Sycamore grove and Arroyo Grande Creek corridor. Some of the issues are: circulation; the locations of active recreation verses passive recreation; interpretive opportunities; and incorporation of the future Arroyo Grande Creek Trail.

A new playground is planned for the park and will be sited as part of the master plan update.

STORMWATER MANAGEMENT ON THE HORIZON & THE IMPACTS TO COUNTY PARK

BY DENIS PHILBIN, PARKS SUPERINTENDENT

The Regional Water Quality Control Board recently approved the County's Stormwater Management Program. This document has been in process for a number of years and the approved copy was the third revision.

Are you aware of what a Stormwater Management Program (SWMP) is? Allow me to briefly review the history before we get into what the impacts will be.

This all started in 1972 when Congress passed the "Clean Water Act". Through amendments and interpretations, the foundation was laid for what now constitutes the Stormwater Management Programs that are required of municipal and local governments to manage the pollution that now runs off our construction sites, streets and landscaped areas into our storm drains and then out to sea. The County's Stormwater Coordinator initially put together a consortium of players from the affected County departments and developed the program into its present form.

There are six minimum control measures involved with a SWMP:

1. Public Education and Outreach
2. Public Participation and Involvement
3. Illicit Discharge Detection and Elimination
4. Construction Site Runoff Control
5. Post Construction Stormwater Management
6. Pollution Prevention & Good Housekeeping for Municipal Operations

OCEANO CAMPGROUND RESERVATIONS

Reservations are now being accepted for Oceano Campground. All of the 22 campsites have water, sewer and electric hook ups. Oceano Campground is located just two blocks from the Oceano Dunes/Pier Avenue beach entrance. Campers staying at Oceano Campground are permitted to use the Coastal Dunes swimming pool and recreation area at no additional charge. Reservations can be placed up to one year in advance by calling (805) 781-4900 (extension 1).

COASTAL DUNES RV PARK

San Luis Obispo County Parks began operating the former Sand and Surf campground on October 1, 2006. The campground was renamed Coastal Dunes R.V. Park. The mile long park has 232 campsites and is conveniently located on Highway One in Oceano. All of the campsites have electric, water and sewer hook ups. Cable television hook ups are available in a few sites. Other campground amenities include barbecues, basketball court, arcade and swimming pool. The first six months of operation were a success largely due to the park's loyal clientele. Upgrades have begun on the park's electrical system and will continue over the next year. Other planned improvements include the addition of wireless Internet service, improved pool operations and summer evening programs. We invite you to visit and enjoy San Luis Obispo County Parks' latest campground addition. Campsites can be reserved up to one year in advance by calling (805) 781-4900 (extension 1).

BLUEBIRDS - THE CHEERFUL CHARMERS

BY DAVE SEIBERT, GROUNDSKEEPER

It was a bright, sunny morning in early March. I was doing some work along the Jim Green trail when I heard the soft warbling song of the western bluebird. I turned to look and found him sitting on the top stem of a tall mustard plant, singing his song of life. His appearance indicated that the bluebirds had returned to our parks. I watched this beautiful bird with its large dark eyes and expressive face.

WESTERN BLUEBIRD

Appearing both alert and amiable, I saw that he had more than just his song of life on his mind. It was breakfast time. He lifted off from his perch, carrying the blue sky on his back, and with a couple of aerobic moves, this fantastic flyer nabbed a small moth and gently returned to his perch to feed in the open field. The aerial agility of bluebirds makes them fliers of fancy, and flight is used in many different ways. One technique is to feed by "hawking" insects flying from a perch and catching insects in midair.

They can also hover as they search the ground for six-legged food. A third and more common method is known as "drop feeding" where the bird flies from a perch to the ground and back again. This is the most familiar and characteristic feeding technique of bluebirds. Flight can be used as part of their communication system as well. During the period of spring courtship, rivals vying for a mate or nest cavity will face off, hovering in midair and putting on quite a show of aerial acrobatics.

I once watched as a pair of male bluebirds, intent on their struggle over a prime nesting site in a telephone pole, fought and grappled with each other in midair until they fell to earth, where they continued their wrestling match, oblivious to the dangers around them. The scrappy western bluebird can be found in most western states and British Columbia. Lucky for us, it is most abundant along the California coast.

Although bluebirds are not strongly migratory, they do wander about in search of abundant food sources and nesting cavities for breeding. Bluebirds seem to prefer farmland, orchards, forest edges, and open woodlands, but they can be spotted anywhere. Early in this century bluebird populations were much higher than they are today. This drop in their numbers can be attributed to many different causes. The introduction of non-native species, like the house sparrow and starling, which compete for the same nesting cavities that bluebirds use, has had a large impact on their reproductive success.

Changes in farming practices are another major reason for the bluebirds decline. Farmers now utilize lands right up to the edge of fence lines, rather than leaving an uncultivated strip around their fields. These areas once provided a much-needed source of food and cover. In addition, those, old, natural wooden posts chock full of holes have been replaced by steel T posts, a change which has further reduced available nesting sites. Fortunately for the bluebirds, conservation efforts that began in the 1970s in the form of establishing nest box trails have had a positive impact on the birds' recovery. Recent Christmas bird counts have shown a modest increase in bluebird populations.

How does this work? A bluebird trail is established in an area where conditions are suitable in the form of abundant food sources and adequate cover. Then boxes of just the right specifications are properly spaced along the trail. With information provided by the California Bluebird Recovery Program we have established just such a bluebird trail in hopes of increasing our local population. So, the next time you come out to the park for a quiet stroll, keep your eyes and ears peeled. If you're lucky, you may catch a glimpse of these beautiful blue fliers as they soar through the air with the greatest of ease, these daring young birds on the edge of a breeze.

STORMWATER MANAGEMENT (continued from page 4)

For County Parks, our primary focus is on Pollution Prevention and Good Housekeeping. This involves a number of issues for us: Pet Waste Management, Yard/Shop Maintenance, Parking & Storage Areas, Plaza's & Sidewalks, Landscape Maintenance, Fountains & Pools and Spill Control & Cleanup. Park's staff has reference materials on hand of "Best Management Practices" (BMPs) that guide them through the processes and procedures to skillfully reduce their pollution potential. Each of the aforementioned topics has its own BMPs which staff can reference to use the best practice to solve their particular issues with drainage and pollution prevention.

The first item we encounter is pet waste management. The Stormwater Coordinator is charged with developing and implementing a pet waste ordinance that sets out the enforcement and penalties to be levied when irresponsible pet owners do not pick up after them. County Parks is required to install Mutts-Mitt stations and disposal locations for pet waste in our facilities. For those not familiar with these products, Mutts-Mitts are plastic bags that conveniently fit over your hand to facilitate picking up after your pet leaves a "deposit", or as the Parks Manager refers to them... "Lawn Cigars". We are required to report annually to the Regional Water Quality Control Board (RWQCB) on the number of Mutts-Mitts purchased and used on an annual basis. The money to fund this program will be discussed in upcoming budget hearings.

Another issue for County Parks is we can no longer blow leaves and debris into the streets, then sweep it into piles for disposal. Parks has purchased a walk-behind vacuum and budgeted for another next year for those buildings, parking lots, plazas and parks that require picking up leaves and debris on a regular basis. We endeavor to recycle all of these materials, but that will be looked at, as it is another level of service and will take budgeted hours away from maintaining County facilities. Again, we are required to report annually to the RWQCB the amount of leaves and debris we collect when vacuuming.

At our shop and storage areas we have to institute measures to reduce our runoff and possible pollution sources. This means stockpiles of soil, compost, woodchips, etc., will have to be covered with tarps. If the piles are too large, we will have to build berms around the piles to retain the water and use wattles, silt fences, hay bales, or other filter media to clean the water before it reaches any drainage. We will create "bio-filters", vegetated areas for runoff to go through as a filtering process before entering the drainage system wherever possible. This again includes each building parking lot, plaza and park facility that staff maintains throughout the County.

We have to make sure that nothing except rain goes into storm drains. So we need to look at all of our cleaning processes such as cleaning up graffiti. Hazardous or toxic chemical cleaners are out; safe, earth-friendly cleaners are in. Any washing of sidewalks, walls or other surfaces requires that you trap the wash water, retrieve it and dispose of it properly. We have to treat our pool backwash water to assure its chlorine free before we send it through the local agency's sewer system. We will revisit our pesticide and fertilizer application systems to assure we are hitting our target and not having any excess get washed into the storm drainage. Each of the septic systems in our park facilities will need to be inspected by an individual certified to do so to assure it is functioning properly. Every one of our septic systems will require a higher level of maintenance than has been required in the past.

The moral of the story is there is a cost for preserving our water resources. We must comply with these procedures to assure we reduce our impact on the waters of California and the US.

NEW PUBLIC TRAILS

County Parks required the development of public trails as part of the Woodlands Development, in Nipomo. The first phase of trail segments, including an equestrian trail and a bicycle path has been completed. The completed segments extend from the southwest corner of the Woodlands site, along the Highway 1 frontage, along Dawn road, and along a portion of Via Concha Road. Eventually, the trails will extend around the perimeter of the Woodlands project.

"Another issue for County Parks is we can no longer blow leaves and debris into the streets, then sweep it into piles for disposal."

FROM THE MANAGER'S DESK

SAN LUIS OBISPO PARKS' OFFICIAL NEWSLETTER

On February 27 the County Parks and Recreation Commission made a major recommendation to the Board of Supervisors. The recommendation to the Board was both simple and complex: “*Act immediately to reestablish an independent Department of Parks Beaches.*” Sounds like a simple idea to restore a structural organization that existed for many decades prior to the fiscal constraints and cutbacks of the post-Prop 13 early 1980s in California. That’s when the Department of Parks and Beaches was absorbed in the new Department of General Services. The goal then was simple: save money. The Commission, based on recommendations from a Blue Ribbon citizen’s task force, proposed to the Board that times have changed in the past 25 years and issues like growing youth crime, an obesity epidemic, and a tourist-based local economy make a vibrant Parks program more important than ever. But here’s the complex part: is reforming an independent the best way to achieve that “vibrant” Parks program and can we afford it? As the stakeholders, one might say “stockholders,” of the County, the Commission urges you to weigh in on the issue. Would you be better served by a more expansive parks and recreation program or are you content with the *status quo*? Understanding that a more expansive parks program will cost more than today’s model, is that investment worthwhile? As taxpayers, it is important for you to share your views with the Board of Supervisors who represent you.
