INVITATION TO BID #3520-11 NEW AND UNUSED TRUCKS

QUESTIONS AND ANSWERS

February 28, 2011

Q. On Spec C & D, the minimum HP is 360. With our cab and chassis the HP is rated at 322. This is mainly a noise emission issue and there is no difference between the 360 HP version in the pickups and the 322 HP version in the cab and chassis. It is just where they stamped the HP in order to meet the noise emission restrictions. The torque is still 380 lb-ft. How shall we indicate this?

A. Just note the HP rating in the "Deviations" column.

Q. On Spec C & D it calls for (5) each tires. This is a dual rear wheel truck so the minimum would be (6) tires. Do you want this to be (7) with a spare?

A. Yes, seven (7) is the correct number of tires. The intention is to have one spare tire included in the purchase and you are correct that a dual rear wheel truck requires six tires instead of four at a minimum.
