SAN LUIS OBISPO, CALIFORNIA 93408

**ANNUAL RURAL ROADSIDE MOWING – NORTH COUNTY AREA**

1. **SCOPE OF WORK:** The work consists of furnishing all labor, materials, tools and equipment required to provide roadside mowing services on rural roads within San Luis Obispo County's unincorporated area. Work shall be performed for the County of San Luis Obispo Public Works Department in accordance with the following plans and specifications.

While the work performed under this contract may include any road within the County's jurisdiction, it is anticipated that the work will be limited to approximately 630 miles of rural county roads that would require approximately 1,260 shoulder-miles of mowing annually. Additionally, it may be necessary to mow some County roads more than 1 time annually to meet County maintenance requirements. These roads are identified on the attached Anticipated Road Mowing List and are located within the northerly portion of the County.

Mowing operation will be conducted at the direction of the appropriate Public Works Section Supervisor, or his/her designee.

2. **SCHEDULE OF WORK:** Mowing operations shall begin no earlier than 5 A.M and ALL operations shall cease no later than 5 P.M

Mowing operations shall begin no sooner than April 15th, and all mowing shall be completed no later than July 1st of each year. Additional mowing may be requested between July 1st and October 31st of each year.

3. **MOWING REQUIREMENTS:** Direct mowing activities to within an area defined from road surface edge to 6 ft. from the road edge (as measured along the ground surface). Areas within 6 ft. of the edge of pavement may have multiple grade planes and may require a "2nd pass" for adequate mowing of vegetation. (See Typical Cross Section)

At the direction of the Section Supervisor, exceed the 6 ft. management area if necessary to promote adequate visibility and sight distance for safety, or to meet cut bank slope requirements. (See Figures 1 and 2)

Mow grass and grass like species to a height of 3-6 inches. Do not mow vegetation to a height of less than three (3) inches, nor leave higher than six (6) inches. Mowing at a lower height risks scalping the ground which may encourage unwanted weeds, increase the chance of throwing rocks, and may cause fire starts. Conduct grass-mowing activities at a rate (speed) that promotes mowing of all vegetation to uniform heights (3-6 inches).

Vegetation shall be mowed to a height of between 3 and 6 inches on cut bank gradients as well as level or near level shoulders.

Outboard "fill slopes" shall be cut consistent with the roadway gradient to the full 6' with outside the edge of pavement per the Typical Cross Section.

If vegetation was missed during mowing operations, re-direct a follow up crew to clean up the area or make another pass to mow the area.

Minimize creation of bare ground when performing mowing operations.

Remove obstacles in mowing path; including road debris, garbage and other materials before mowing the area. Do not mow around them.

After mowing is completed, the road surface should be cleared of all debris created from mowing activities to reduce hazards for the traveling public.

4. **EQUIPMENT**: Mower tractors shall have a minimum of 1 side mounted flail type mow heads, and capable of mowing both level and sloped surfaces. Mowing tractors shall be a minimum of 50 horsepower, and shall be equipped with adequate warning devices and lights for safe operation and shall meet all vehicle operation requirements of the State of California Department of Motor Vehicles, the California Highway Patrol, and any other applicable Local, State or Federal regulatory agency.
5. **WORK ZONE REQUIREMENTS**: The work zone(s) shall be reviewed and analyzed for safety and operational risks prior to start of work each day. This review shall include but not be limited to the following:

**Utilities**: Refer to structures that are created for electrical, phone or other infrastructure requirements. These include power-lines, phone boxes, guy-lines and underground utilities.

**Fixtures**: Refers to structures that are created for traffic control, property delineation and safety, these include traffic signs, delineator posts, mailboxes, fences, and guardrails.

Utilities and fixtures may impede routine vegetation management activities within the county rights-of-way. It shall be the contractor's responsibility to locate and avoid damaging all Utilities and Fixtures within the work zone.

6. **TRAFFIC CONTROL**: The contractor shall be responsible for providing traffic control throughout all phases of work in accordance with the CaMUTCD 2010 Part 6 (Temporary Traffic Control). Contractor should pay special attention to requirements TA-4, and TA-17 for reference to mobile work zones. It is anticipated that a shadow vehicle will be required for most work.
7. **FIRE SAFETY**: It shall be the contractor's responsibility to meet all Federal, State, and Local agency regulations and requirements for fire safety when performing any and all roadside mowing.

Either the mowing tractor or the shadow vehicle shall be equipped with the following fire suppression capability or the equivalent:

A minimum of 100 gallons water supply, pump, and hose sufficient to suppress a fire at least 50 fifty away from the vehicle.

Both the mowing tractor and the shadow vehicle shall also be equipped with a handheld fire extinguisher suitable for a vehicle fire or small wild land fire.

8. **TERM OF CONTRACT**: This contract shall be for a term of one (1) year with an option to extend for four additional years with all terms and conditions remaining the same. Renewal shall be by mutual consent, in writing.

9. **PRICING**

Prices offered shall be firm for the contract period beginning April 19, 2011 and ending June 30, 2012.

A price increase may be allowed for each option period as the result of:

1. Manufacturer or Supplier price increases in the product(s) offered;
2. Governmental or regulatory agency increases to the trade;
3. National Average Consumer Price Index (CPI-U) increases as published by the United States Department of Labor

Any request for a price increase must be substantiated with documentation from the vendor, a manufacturer, supplier, or governmental agency and must be submitted in writing at least thirty (30) days prior to the effective date of the increase. Such changes shall be subject to acceptance; the County reserves the right to accept those prices or to give thirty (30) days notice and rebid. Overall increases of greater than 3% from prior year prices will not normally be allowed.

10. **NON-EXCLUSIVE**: The County reserves the right to award more than one Purchase Order for roadside mowing Services. It is the intent for the County to hire a single contractor for this work. However, additional contractors may be hired or County forces may be used as needed to meet peak demands.

11. **TERMINATION OF CONTRACT**:

**WITH CAUSE**: The County may immediately cancel this contract for cause. Due cause for termination shall include, but not be limited to failure to deliver according to schedule, failure to respond to technical questions in a satisfactory manner, and/or other reasons of unsatisfactory service.

**WITHOUT CAUSE**: Both the County and the contractor may, upon giving thirty (30) days written notice, terminate this contract with or without cause.

12. **PAYMENT**:

**Roadside Mowing**: Payment shall be paid by the actual mile mowed of six foot wide shoulder, regardless of the number of passes required and shall include traffic control, fire safety and all labor, materials, tools and equipment required to provide roadside mowing services in accordance with these specifications.

**Directed Additional Mowing**: Payment shall be paid by the actual hours worked at the site and shall include traffic control, fire safety and all labor, materials, tools and equipment required to provide the additional mowing services in accordance with these specifications.

13. **PAYMENT PROCESS**: Contractor shall to provide an original monthly invoice to the Public Works department. Payment occurs after invoices are received, approved for payment by the appropriate Department and processed for payment. Payment is normally made within 30 days after the receipt of acceptable goods or an invoice, whichever is later.
