

2014 SAN LUIS OBISPO COUNTY CALENDAR

IMPORTANT EMERGENCY INFORMATION

ABOUT DIABLO CANYON POWER PLANT
FOR SAN LUIS OBISPO COUNTY RESIDENTS AND VISITORS

EDNA VALLEY PHOTO BY CAT EVANS

WHAT TO DO DURING AN EMERGENCY

PAGE 1

1 IF YOU HEAR A STEADY SIREN FOR 3-5 MINUTES

- Tune to a local radio or television station for emergency information. When at sea, tune to Marine Channel 16.
- **Do not call 911!** Information on actions you should take will be broadcast on local radio and television stations.
- Do not evacuate unless directed to do so, because sirens can be used for any emergency.

2 IF CHILDREN ARE IN SCHOOL

- Do not pick your child up at school unless directed to do so.
- Listen to local radio and television stations for details on school relocations, sheltering in place, or other actions.
- Children may be moved to another location based on their school's emergency plans.

3 IF YOU ARE TOLD TO SHELTER IN PLACE

- Gather your family members and pets inside the nearest building.
- Close and seal all doors and windows and turn off ventilation systems that bring in outside air.
- Move to the center of the house. Take a radio with you so that you can listen to local stations for continuing information.

4 IF YOU ARE TOLD TO EVACUATE

- Remember, you have time to leave in a safe and calm manner.
- Check on your neighbors who may need evacuation assistance.
- Make a note of the Monitoring, Decontamination, and Reception Center for your Protective Action Zone (PAZ) announced over the Emergency Alert System (EAS).
- If you have Potassium Iodide (KI), take it with you. Do not return to retrieve it.

5 IF YOU REQUIRE EVACUATION ASSISTANCE DUE TO A MEDICAL NEED

- Ensure your disaster supply kit and bag of personal items is ready.
- Leave the area with family, friends, or neighbors if you are able to do so.
- **Do not call 911!** If you have not pre-registered on the Evacuation Assistance List call (805) 543-2444.

6 FOR MORE INFORMATION DURING AN EMERGENCY

- County Phone Assistance Center:
(805) 543-2444
- Do not call 911 unless it is a life threatening emergency.

INTRODUCTION

Thank you for taking the time to read the important emergency information included in this calendar. This 2014 calendar is provided by San Luis Obispo County Office of Emergency Services to help prepare you and your family for a potential emergency at Diablo Canyon Power Plant (DCPP) as well as other types of emergencies we may experience in San Luis Obispo County.

Approximately 100 stunning photographs were submitted in this year's DCPP Photo Contest, and we are pleased to present you with the final photos. Please look for the photographers' names and the locations under each of the winning photographs.

We encourage you to keep this calendar throughout the year to reference should an emergency occur.

If you need special assistance or information in Spanish fill out the request cards that can be found in the back of this calendar, and mail them now.

INFORMACIÓN EN ESPAÑOL

Si desea recibir esta información en español, por favor envíenos la tarjeta postal gratis en la parte posterior de este calendario inmediatamente.

This calendar contains useful information about:

Levels of Emergencies.....	page 10
Radiation	page 10
Emergency Planning Zone Map	page 11

THE EMERGENCY PLANNING ZONE (EPZ)

Technical experts and government agencies have worked to develop nuclear power plant emergency response plans for all of the commercial nuclear power plants in the United States. The Nuclear Regulatory Commission (NRC) and the Environmental Protection Agency (EPA) determined that an Emergency Planning Zone be established around each plant to allow for emergency planning and response. The EPZ was designated to be roughly a ten mile radius. FEMA has oversight responsibilities for emergency planning within this area.

The State of California expanded the Diablo Canyon EPZ so that it is much larger than the EPZ defined by the federal government to allow for further planning. The DCPP Emergency Planning Zone is divided into 12 smaller Protective Action Zones (PAZs). If there is a major emergency, residents in the EPZ may be asked to take protective actions, such as evacuation or shelter in place. Diablo Canyon and San Luis Obispo County have emergency response plans that are tested regularly and evaluated by fed-

eral officials. It is unlikely that an emergency at Diablo Canyon would affect the entire EPZ, that is why it is divided into twelve smaller PAZs. PAZs help organize emergency planning and response actions into areas that are familiar to emergency response agencies and the public.

Surrounding the 12 PAZs are three zones known as Public Education Zones (PEZs). Residents in these areas are not likely to be affected by an emergency at the DCPP. However, since residents in the PEZ (zones 13 through 15) are near the Emergency Planning Zone, general information about Diablo Canyon is also provided to them.

PRECAUTIONARY ACTIONS THAT COULD BE TAKEN

Following an emergency at DCPP, the county may recommend precautionary actions that affect a limited number of people in a specific area. Precautionary actions may take place early in the emergency, when there is no immediate danger. Media releases will be

distributed to inform the public about any precautionary actions being recommended. Normally, the sirens will not sound when precautionary actions are taken. Some examples of precautionary actions are

- Closing or relocating schools.
- Restricting hospital admissions.
- Canceling activities expected to draw visitors to the area.
- Closing parks, recreation areas, and beaches.

If the emergency becomes more serious and local officials determine that the general public in one or more of the PAZs need to take protective actions such as evacuation or shelter in place, public notifications such as the siren system will be utilized. Following the use of the sirens, information about the emergency situation, protective actions that are directed and instructions will be broadcast over the Emergency Alert System (EAS).

Remember, preparing for emergencies in advance is the best way to help protect yourself and your family.

PUBLIC ALERT & NOTIFICATION SYSTEMS

PAGE 3

SIRENS

The San Luis Obispo County Early Warning System (EWS) sirens extend throughout the Emergency Planning Zone (EPZ). Although the siren system was installed in conjunction with Diablo Canyon, *THIS SYSTEM MAY BE USED FOR ANY LOCAL EMERGENCY*. When activated, the sirens will produce a steady wail for 3-5 minutes. The sirens are an indication that the Emergency Alert System has been activated, and emergency information will be provided on local radio and television stations.

EMERGENCY ALERT SYSTEM (EAS)

The EAS is a national public warning system that requires radio and television stations to broadcast emergency information provided by local, state and federal officials. During an emergency, local officials would activate the EAS to provide emergency information and actions necessary to the general public. Local radio and television stations will broadcast important information throughout the emergency. To ensure you can tune into this system during all types of emergencies, make sure you have a battery powered radio at your home and workplace.

EMERGENCY TELEPHONIC NOTIFICATION SYSTEM (REVERSE 911)

San Luis Obispo County officials have the capability to inform the public of an emergency by utilizing an emergency telephonic notification system. This system allows emergency officials the ability to notify residents and businesses in a designated area by telephone of an emergency and actions they may need to take. San Luis Obispo County officials may choose to utilize this system for any emergency taking place in the county. If an emergency were to occur at Diablo Canyon and public protective actions were necessary, this system may be utilized to supplement the primary notification systems which include the sirens and Emergency Alert System.

The telephonic notification system utilizes the 9-1-1 telephone database and therefore is able to contact listed and unlisted land-line telephones. If you have a Voice over IP (VoIP) or cellular telephone that you would like to be notified on, you must self-register those telephone numbers. To register, go to www.slocounty.ca.gov/oes/Reverse911.

ROUTE ALERTING

Route Alerting is a form of alert and notification that is used frequently in small scale emergencies or during rapidly changing situations in a designated area. In route alerting, emergency officials drive or walk through an affected or potentially affected area alerting residents in that area of the emergency and actions they need to take. Route Alerting can be conducted door to door or via a public address system on a police car, fire engine, or other equipped emergency vehicle. Although route alerting is effective when other systems are unavailable, it is dependent on resource availability and can be a slow process. Route Alerting is traditionally implemented in areas that need to take immediate action.

NOAA WEATHER RADIOS

Emergency alert radio signals are provided by the National Oceanographic and Atmospheric Administration's (NOAA) National Weather Service (NWS). These radio signals are not accessible over AM/FM radios but are received by NOAA weather radios. Weather alert radios can be used to alert the public of any emergency, not just weather events. Upon hearing the tone, tune to San Luis Obispo County radio or television stations to hear the Emergency Alert System (EAS) messages. For additional information, see the National Weather Service website at www.nws.noaa.gov/nwr/.

SOCIAL MEDIA

In addition to traditional forms of public notification, social media is a method that may be utilized to share information regarding an emergency. Although emergency officials will continue to utilize the Early Warning System sirens and the Emergency Alert System as the primary alert and notification method, we welcome the public to connect with us on facebook and twitter.

Connect with us on Facebook®
facebook.com/SLOCountyOES

Follow us on Twitter®
[@slocountyoes](https://twitter.com/slocountyoes)

TESTING OF THESE SYSTEMS

Testing of public alert and notification systems is an important aspect of emergency planning. These tests help ensure that the systems are available and in working order should they be needed in any type of emergency. Although these systems are tested frequently throughout each year, only a few of these tests will be heard by the public.

EWS SIREN TESTING

The Early Warning System sirens are tested annually in a full scale test during the month of August. During the annual test, all 131 sirens will be sounded at full volume for approximately 3-5 minutes. The siren system will be sounded at noon and again at 1230pm to allow emergency officials to test both the primary and backup activation points. There is no action required or requested on the part of the public during this test.

In addition to the full scale test, the sirens undergo a monthly silent test as well as quarterly low power growl tests. Although you may notice the sirens rotating, or hear a low volume siren sound for a period of a few seconds, there is no action required or requested on the part of the public during these tests.

EMERGENCY TELEPHONIC NOTIFICATION SYSTEM (REVERSE 911) TESTING

The Reverse 911 system will be activated for residents and businesses within the Emergency Planning Zone in the month of August to coincide with the Annual Full Scale Siren Test. All landline telephones within the EPZ will receive a recorded message during the test. Cellular phones and Voice-over IP phones that have been registered into the system will also receive the test message. For information regarding how to register your Voice over IP or cellular telephone to receive emergency messages, visit www.slocounty.ca.gov/oes/Reverse911.

EMERGENCY ALERT SYSTEM TESTING

The Emergency Alert System (EAS) is tested regularly throughout the year during weekly and monthly tests. The test that will be seen and heard by the public occurs on the first Thursday of every month and is broadcast on local radio and television stations. No action on the part of the public is required during these tests.

FOR THE 2014 CALENDAR YEAR

The annual siren and Reverse 911 test will be conducted on Saturday, August 23, 2014. The quarterly growl tests will be conducted on: January 7 and 8, April 1 and 2, July 22 and 23, and October 14 and 15.

WHAT TO DO IF YOU HEAR THE SIRENS

This means you should tune to a local radio or television station. These stations will have official information about what you should do, including possible evacuation or shelter in place.

If an emergency were to occur at Diablo Canyon, it is likely that only a small part of the county would need to take action. To know whether you or others in your family may be affected you must know the PAZ numbers for your home, business or schools that your children attend. PAZs are within the EPZ shown on the map on page 11. PAZ numbers will be used in official Emergency Alert System (EAS) announcements heard on local radio and television stations.

- Go indoors and tune to a local radio or television station. Stay tuned and listen for important information and instructions. Tune to Marine Channel 16 for emergency information if you are at sea.
- If you are able, check on your neighbors and make sure they are aware of the emergency warning and related emergency actions.
- Only call (805) 543-2444 if you urgently need information or assistance during an emergency. The County Office of Emergency Services activates this phone line only when there is an emergency that affects large numbers of people in the county.
- *If sirens sound and there is no message on local radio or television stations, there may have been a siren malfunction. Please report siren malfunctions to the Sheriff's Department at (805) 781-4553.*
- **DO NOT CALL 911!** 911 is an emergency line for people who need urgent medical, fire, or police help. Using 911 for information ties up the system and may delay help for someone who needs it.
- Do not evacuate unless you are told to do so over the Emergency Alert System or by emergency officials.
- Do not use your telephone unless you need to call for help. Please leave telephone lines open and emergency personnel available for people who need immediate lifesaving help.

OUR PUBLIC ALERT AND NOTIFICATION SYSTEMS MAY BE USED FOR ANY LOCAL EMERGENCY

TSUNAMI/FLOOD

NUCLEAR

FIRE

HAZMAT

EVACUATION

SHELTER IN PLACE

EVACUATION INFORMATION

Evacuation means that the population in a specific area is ordered to leave the area. In the event of a serious emergency at Diablo Canyon Power Plant, people would likely be evacuated by PAZ. You can find the PAZ for your home or office on the map on page 11. It is extremely unlikely that an emergency would require all of the PAZs to evacuate at the same time. It is more likely that any decision to evacuate would involve one or two PAZs. Evacuation routes are designated on the Emergency Planning Zone map on page 11.

IF YOU ARE TOLD TO EVACUATE:

- Make sure the PAZ you are in is one that must evacuate (see map on page 11).
- Remember, you have time to leave in a calm manner.
- Pack to spend three days away from home. Pack only essentials. Remember to pack items such as: medications, important documents, personal hygiene products and specialty items such as infant or pet needs.
- If you have Potassium Iodide (KI), take it with you. Do not return to retrieve it.
- Make a note of the evacuation route and Monitoring, Decontamination and Reception Center for your PAZ. If you need a place to stay, you can receive assistance there.
- Children in public schools will be moved to a Public School Relocation Center by bus. You can pick them up there. See Public School Relocation Center information on page 7.
- DO NOT try to contact or pick up your children at public schools unless you are directed to do so. This could cause traffic and safety problems for children who are being moved.
- Take your pet with you. Remember to take pet food, carrier, supplies and medications. Listen to public information regarding shelters that will accept pets.
- Try to shelter farm animals, if you have them. Leave water and feed (enough for several days).

- Do not turn off gas service to your house unless the EAS messages tell you to do so, or you suspect a leak.
- Try to ride with friends or neighbors, or offer transportation to others who may need it. Assist neighbors who may need evacuation assistance. Do not drive a car in poor running condition or one that is nearly out of gas.
- If you need transportation and can't find a ride with a friend or neighbor, walk to the Carless Collection Point nearest you. (Collection points are shown on page 6).
- Drive with your car windows and outside vents closed.
- Listen to a local radio or television station for further instructions.
- Do not use the telephone except to report a life-threatening medical, fire or police emergency.
- Only call the County Phone Assistance Center, (805) 543-2444 if you urgently need information or assistance.
- If you are not at home, listen to emergency official's instructions as there may be an opportunity to return home.
- Stay tuned to local radio and television stations for emergency information.

EVACUATION ROUTES

U.S. Highway 101 and State Highway 1 are the primary evacuation routes out of the EPZ. State highways and local roads can be used to reach U.S. Highway 101 and State Highway 1. The California Highway Patrol, police officers, and other officials will direct traffic along these routes. The EPZ map in this calendar shows the primary evacuation routes. Local radio and television stations will provide information about evacuation routes.

WHERE TO GO IF YOU ARE TOLD TO EVACUATE

Go to the home of a friend or relative outside the area affected. If this is not possible, go to one of the Monitoring, Decontamination and Reception Centers announced on local radio and television stations.

If necessary, Monitoring, Decontamination and Reception Centers will be opened by public officials and the American Red Cross. A Monitoring, Decontamination and Reception Center is a location where people can go to be monitored for contamination, receive assistance in decontamination (if applicable) and be registered by county and American Red Cross personnel. Shelter may be provided at the reception center or at a nearby location, such as a high school gymnasium. To the south of the EPZ, the Santa Maria Fairpark in Santa Barbara County is designated as a Monitoring, Decontamination and Reception Center. To the north of the EPZ, Camp Roberts is the designated Monitoring, Decontamination and Reception Center. Listen to local radio and television stations for specific information regarding these centers. Assistance with locating family members will also be available at these centers. Service animals are welcome at these facilities.

EVACUATION ASSISTANCE

The San Luis Obispo County Office of Emergency Services maintains a list of individuals who would require special evacuation assistance during an emergency at Diablo Canyon Power Plant. This list is for independent living individuals who would be unable to evacuate themselves due to a disability or medical need. However, individuals on this list who live in an area ordered to evacuate, are encouraged to leave the area through other means, such as family, friends, or neighbors as transportation resources will be limited. Evacuation assistance will be provided as resources become available. If you live within the EPZ and would require special evacuation assistance getting to a Monitoring, Decontamination and Reception Center, please fill out and mail the prepaid postage card in the back of this calendar. Once your request card is processed, you will receive a confirmation letter. For any questions please call the Office of Emergency Services at 781-5011. For individuals who need transportation assistance not due to a disability or medical need, see the Carless Collection Points on the next page.

IF YOU DO NOT HAVE TRANSPORTATION

CARLESS COLLECTION POINTS

A Carless Collection Point is a location to obtain transportation out of an area ordered to evacuate. If an evacuation is ordered for your PAZ and you do not have transportation, try to find a ride with a friend or neighbor. If you can't find a ride, walk to the nearest carless collection point for your PAZ.

Emergency officials will dispatch buses to Carless Collection Points in PAZs that have been ordered to evacuate. These buses will provide transportation to Monitoring, Decontamination and Reception Centers.

These collection points are just locations to obtain transportation out of an evacuated area. They are not places to obtain shelter.

If you are unable to walk to a Carless Collection Point because of a disability or medical need, call the County Phone Assistance Center at (805) 543-2444. (This number will be activated only during an emergency.) Listen to a local radio or television station for further details. Do not call 911 unless you need urgent emergency assistance.

PAZ AREA	CARLESS COLLECTION POINT
1 Plant Site	- Not applicable for the general public
2 6-Mile Radius Low-Population Zone	- (call (805) 543-2444)
3 Avila Beach	1 Avila Beach Community Center, 191 San Miguel, Avila Beach
Avila Beach/San Luis Bay	2 Fire Station 62, San Luis Bay Estates, San Luis Bay Drive
4 See Canyon/Prefumo Canyon/LOVR	- (call (805) 543-2444)
5 Baywood/Los Osos	3 Los Osos Christian Fellowship, 1335 7th Street at Santa Maria Avenue, Baywood Park
	4 Trinity United Methodist Church, 490 Los Osos Valley Road at Pine Avenue
	5 Vons Shopping Center, Los Osos Valley Road near 10th Street
6 Pismo/Shell Beach, City of Pismo Beach	6 Spyglass Inn Parking Lot, 2705 Spyglass Drive, Shell Beach
	7 Pismo Vets Hall, 780 Bello Street, Pismo Beach
	27 Pacific Coast Plaza, 825 Oak Park Road near Highway 101 (this collection point serves both Zones 6 & 10)
7 Price Canyon	- (call (805) 543-2444)
8 San Luis Obispo/Cal Poly/Cuesta	8 Albertson's Shopping Center, 772 Foothill Boulevard near Broad Street
	9 Laurel Lane Shopping Center, 1257 Laurel Lane at Augusta Street
	10 Meadow Park Recreation Hall, Meadow Street at South Street
	11 Laguna Lake Golf Course Club House, 11175 Los Osos Valley Road at Laguna
	12 Veterans Building, 801 Grand Avenue at Monterey Street
	13 Mission San Luis Obispo, 782 Monterey Street at Chorro Street
	14 Padre Plaza Shopping Center, Higuera Street and Prado Road
	15 Cal Poly North side of Mustang Stadium, "O'Neil Green"
	16 Cal Poly parking area M, the corner of Mount Bishop, and Highland Drive
	17 Cal Poly parking lot G1-R2, Grand Avenue and Slack Street
	39 Cuesta Community College Library Building #3100
	40 Cuesta Community College Parking Lot #3 on Romauldo Street
	41 Cuesta Community College Soccer Fields next to the Service Road
9 Morro Bay	18 Morro Bay Presbyterian Church, 485 Piney Way at Anchor Street
	19 Morro Elementary School, 1130 Napa Avenue at Monterey Avenue
	20 Morro Bay High School, 235 Atascadero Road at Highway 1
	21 Spencer's Market, 2650 Main Street at Elena Street
	22 Del Mar School, 501 Sequoia Street at Fir Avenue
Cayucos	23 Cayucos Veterans Hall, North Ocean Avenue at Cayucos Drive
	24 Fire Station 11, Chaney Avenue and Ocean Boulevard
10 Five Cities Southern Portion Arroyo Grande	25 United Methodist Church, 275 N. Halcyon Road at Bennett Avenue
	26 St. Patrick's Church, 501 Fair Oaks Avenue near Valley Road
	27 Pacific Coast Plaza, 825 Oak Park Road near Highway 101 (this point serves both Zones 6 & 10)
	28 Elm Street Park Recreation Center, 1221 Ash Street, near Elm Street
	29 Arroyo Grande City Hall, 214 East Branch Street at Mason Street
	30 Peace Lutheran Church, 244 Oak Park Boulevard at Ramona Avenue
	31 South County Regional Center, 800 West Branch Street
Grover Beach	32 Grover Beach Police Department, 711 Rockaway Avenue at South 8th Street
	33 Ramona Garden Center, 993 Ramona Avenue at North 10th Street
	34 Grover Heights Elementary School, 770 North 8th Street at Ritchie Road
	35 Grover Beach Elementary School, 365 South 10th Street at Longbranch Avenue
	36 Grover Beach Community Center, 1230 Trouville Avenue at South 12th Street
Oceano	37 Oceano Community Center, 1425 19th Street
11 Price Canyon/Orcutt Road	- (call (805) 543-2444)
12 Nipomo (North of Willow Road)	38 Lopez High School, 1055 Mesa View Drive, Arroyo Grande

SCHOOL INFORMATION

IF YOUR CHILDREN ARE IN PUBLIC SCHOOL

As a precaution, public school officials may decide to close their schools and move students to a School Relocation Center before any public action is required. They will be moved by bus to a School Relocation Center under constant adult supervision. Listen to a local radio or television station for details on school relocations and where to meet your children.

Parents should not pick up children at public schools unless they are directed to do so. This could cause traffic and safety problems for children who are being moved and delay the process. Also, children may have already been moved to a Public School Relocation Center before parents arrive.

IF YOUR CHILDREN ARE IN DAYCARE, ATTEND PRIVATE SCHOOLS, OR ARE IN BEFORE/AFTER SCHOOL PROGRAMS

Please check with your children's care provider concerning emergency plans as they differ from school to school.

SCHOOL	PAZ	SCHOOL RELOCATION CENTER
BELLEVUE-SANTA FE CHARTER SCHOOL		
Bellevue-Santa Fe Charter School	3	May be initially moved to C.L. Smith School in SLO, then to Paso Robles Event Center (Mid State Fairgrounds)
SAN LUIS COASTAL UNIFIED SCHOOL DISTRICT		
Baywood Elementary, Monarch Grove Elementary, Los Osos Middle School	5	Paso Robles Event Center (Mid State Fairgrounds)
Bishop's Peak/Teach Elementary, Hawthorne Elementary, Los Ranchos Elementary, Pacheco Elementary, Sinsheimer Elementary, C.L. Smith Elementary, Laguna Middle School, Pacific Beach High School, San Luis Obispo High School	8	Paso Robles Event Center (Mid State Fairgrounds)
Del Mar Elementary, Morro Bay High School	9	Paso Robles Event Center (Mid State Fairgrounds)
LUCIA MAR UNIFIED SCHOOL DISTRICT		
Shell Beach Elementary, Judkins Middle School	6	Nipomo High School in Nipomo
Grover Beach Elementary, Grover Heights Elementary, Harloe Elementary, Fairgrove Elementary, Oceano Elementary, Ocean View Elementary, Paulding Middle School, Arroyo Grande High School	10	Nipomo High School in Nipomo
Branch Elementary	11	Nipomo High School in Nipomo
Lopez High School, Mesa Middle School	12	Nipomo High School in Nipomo
CAYUCOS SCHOOL DISTRICT		
Cayucos Elementary School	9	Santa Lucia School in Cambria
COUNTY OFFICE OF EDUCATION - COMMUNITY SCHOOLS		
San Luis Obispo Community School	8	Chalk Mountain Community School in Atascadero
Loma Vista Community School	9	Chalk Mountain Community School in Atascadero
Mesa View Community School	12	Nipomo High School in Nipomo
COUNTY OFFICE OF EDUCATION - SPECIAL EDUCATION/CALIFORNIA STATE PRESCHOOL STUDENTS		
CA State Preschool at Sunnyside	5	Paso Robles Event Center (Mid State Fairgrounds)
CA State Preschool at Chris Jespersen, Vicente School, Chris Jespersen	8	Paso Robles Event Center (Mid State Fairgrounds)
CA State Preschool at Del Mar Elementary	9	Paso Robles Event Center (Mid State Fairgrounds)
Grover Heights Elementary, Arroyo Grande High School, CA State Preschool at Grover Beach Elementary, Oceano Edu. Center, CA State Preschool/First 5 Classroom at Oceano Elementary	10	Nipomo High School in Nipomo
Mesa Middle School	12	Nipomo High School in Nipomo

SHELTERING IN PLACE INFORMATION

Sheltering in Place means staying inside with all doors and windows closed, and ventilation systems turned off. Sheltering reduces exposure to radioactive material. It reduces the chances of inhaling or receiving body surface contamination from radioactive materials if they pass overhead.

IF YOUR PAZ IS ORDERED TO SHELTER:

- Gather members of your household and pets inside the nearest building. If children are at school, DO NOT pick them up unless you are directed to do so (if schools are sheltering they will not open their doors).
- If you are not at home, shelter in the building nearest you.
- Shut and tightly seal all doors and windows. Use duct tape and heavy plastic sheeting or place towels to fill gaps in door frames or windows. Be prepared to improvise and use what you have available.
- Turn off systems that bring in outside air. These include furnaces, fireplaces, air conditioners, vents and clothes dryers.
- Move to the center of the house.
- Take a radio with you and stay tuned to a local radio station for continuing information.
- If you must go outside, place a damp cloth or towel over your mouth and nose. This will limit the amount of radioactive materials you breathe in. Limit your time outside as much as possible.
- If you are in transit, you should enter a nearby building or leave the affected area if you are unable to find shelter.
- Remain tuned in to radio and television in case the situation changes or "all clear" is issued.

POTASSIUM IODIDE (KI) INFORMATION

POTASSIUM IODIDE (KI)

The San Luis Obispo County Public Health Department has made available a two day supply of potassium iodide (KI) in tablet form for residents who live or work within a Protective Action Zone (PAZ). Participation in the pre-distribution program is voluntary. KI **will not** be distributed at Monitoring, Decontamination and Reception Centers. KI can also be ordered from several commercial manufacturers by telephone, mail, or via the internet, plus there is a voucher in the back of this calendar.

Should a nuclear power plant emergency occur that involves a release of radiation, government officials may order evacuation or shelter in place as a protective action. KI tablets may also be directed as a supplemental protective measure.

KI should only be taken after specific instruction by a state or local public health official.

KI is not an "anti-radiation" pill. It is only a supplemental protective measure, secondary to evacuation or sheltering in place. KI protects the thyroid gland against exposure to radioactive iodine in the unlikely event of a radiation release from a nuclear power plant. If taken in an appropriate and timely dosage, KI may block exposure of the thyroid gland from radioactive iodine. However, KI does not protect other parts of the body from exposure to radioactive material that may be released during an emergency.

KI will not be available at Monitoring, Decontamination and Reception Centers. If you evacuated without your KI, do not return to get it.

VOUCHER FOR POTASSIUM IODIDE (KI) FOR GENERAL POPULATION

The San Luis Obispo County Public Health Department is providing two KI doses in tablet form for residents who live or work within a Protective Action Zone (PAZ). A KI Voucher is in the back of this calendar, and residents may use the voucher to obtain KI from authorized locations. Individuals who receive KI will be provided with copies of the KI manufacturer package insert or similar prepared information and instructions.

HOW MUCH POTASSIUM IODIDE (KI) TO TAKE

One Tablet = 65 milligrams of KI

Adults 18 Years and Older.....	Two Tablets
Pregnant or Nursing Women.....	Two Tablets
Adolescents 12-18 Years Old.....	One to Two Tablets*
Children 3-12 Years Old.....	One Tablet
Children 1 Mo. to 3 Years Old.....	Half Tablet
Infants, Birth to 1 Month.....	Quarter Tablet

**Adolescents approaching adult size
(equal to or greater than 150 pounds)
should receive the full adult dose.*

KI PRE-DISTRIBUTION LOCATIONS ARE

SLO COUNTY PUBLIC HEALTH DEPARTMENT
Grover Beach: 286 South 16th Street
San Luis Obispo: 2191 Johnson Avenue

Additional information is available on the San Luis Obispo County Office of Emergency Services website,
www.slocounty.ca.gov/oes/ki

AGRICULTURAL EMERGENCY PLANNING

In addition to the Emergency Planning Zone, an Ingestion Pathway Zone which extends in a 50 mile radius from DCPD has been designated to assist officials with the protection of the food supply following an emergency at Diablo Canyon.

POSSIBLE EFFECTS FROM A RADIOLOGICAL RELEASE TO AGRICULTURAL PRODUCTS AND AREAS

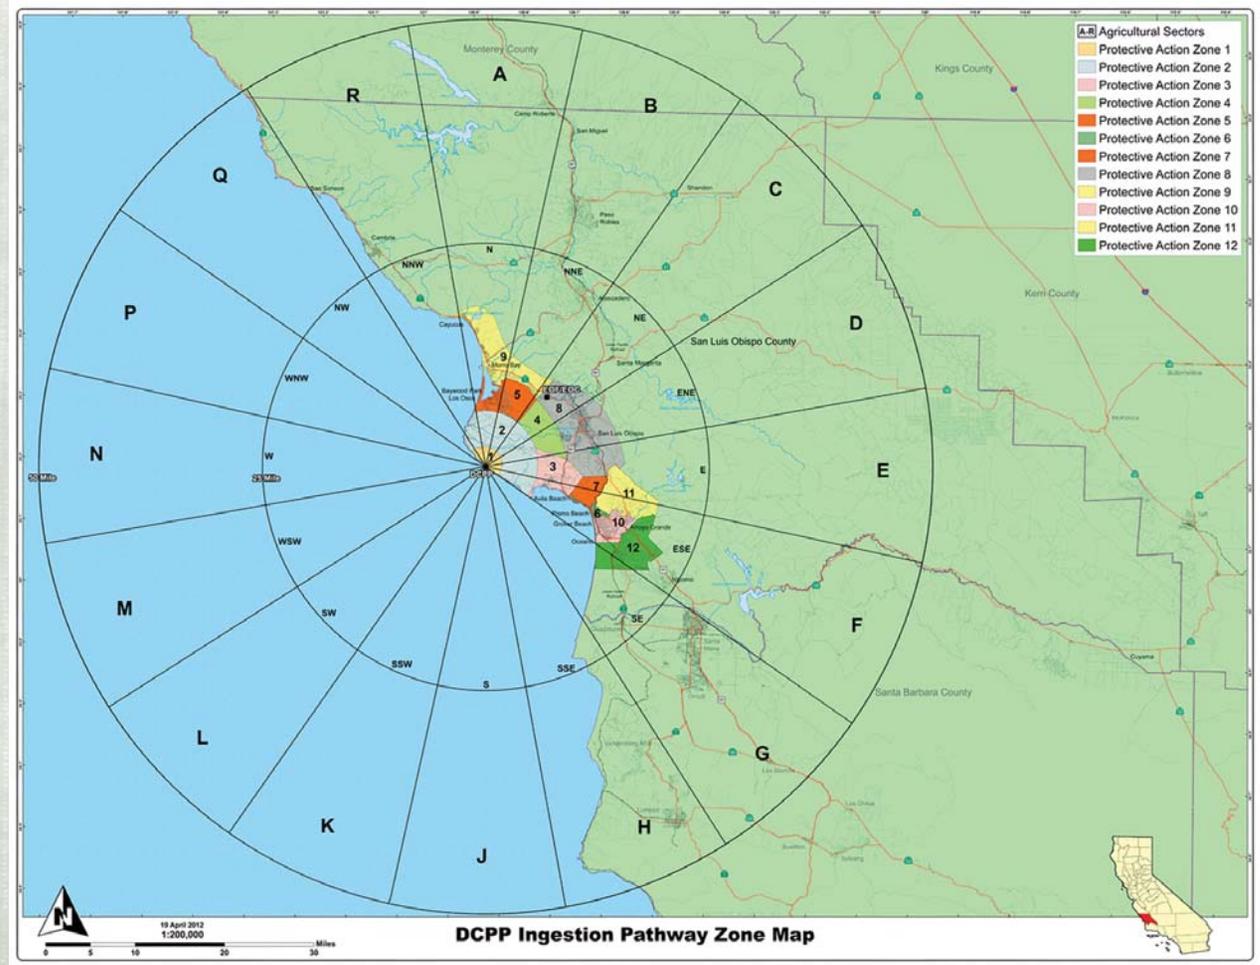

Radioactive materials released during an emergency at a nuclear power plant may be dispersed by wind and deposited on land, crops, livestock, food, and water supplies causing contamination. Contamination is the presence of radioactive materials where they are not wanted. The impact on agriculture will depend on the extent of the radiological release, quantity and type of radiological materials deposited, and weather conditions. Contamination may be minor and may not cause any ill effects.

AGRICULTURAL ACTIONS

For agricultural areas within the 50 mile Ingestion Pathway Zone, the main goals of local and state officials will be to prevent contamination of the food supply and to keep contaminated products from going to market. To accomplish this, officials will utilize information regarding the release of radioactive materials and provide instructions and actions you should take such as the quarantine of agricultural commodities or restrictions on agricultural activities. Sampling and analysis will determine the area of contamination and any products affected.

Several of the actions which may be taken to protect agricultural products, animals, and other commodities include:

- Quarantine of food, animals, and other agriculture commodities
- Temporary or permanent restriction of agricultural activity
- Recommendation of placing animals on stored feed
- Restricting the movement of commodities and animals

- until they have been determined to be in compliance with health standards
- Requiring the decontamination or special handling of contaminated animals and other commodities
- Temporary holding of commodities from outside the quarantine area to be certified to meet destination shipping requirements

- Stopping and inspecting all vehicles coming from or passing through designated areas.
- Following an emergency, the public will be provided specific instruction on actions they should take. Instructions will be based on power plant conditions, the extent of the radioactive release and the levels of contamination. In all cases, public health and safety will be the first priority.

LEVELS OF EMERGENCIES AT NUCLEAR POWER PLANTS

Nuclear power plant emergencies are classified into one of four classifications described below. At each level, PG&E would notify local, state and federal officials. These officials would take action as outlined in their emergency plans.

UNUSUAL EVENT - A minor, unplanned event has occurred. No threat to public health and safety.

ALERT - A plant safety system has been damaged or may have been damaged. No threat to public health and safety.

SITE AREA EMERGENCY - A radiological release may be expected to occur or has occurred. The release would not be expected to exceed federal exposure limits beyond the plant site boundary, an area about 1,000 yards from the reactor.

GENERAL EMERGENCY - A significant release of radioactivity has occurred or may occur. Protective actions may be required in several of the Protective Action Zones.

ABOUT RADIATION

The term radiation is very broad and includes such things as light and radio waves. It is most often used to mean ionizing radiation. Ionizing radiation is particles or rays given off by unstable atoms. Radiation is produced inside a nuclear reactor when the uranium atoms split or "fission". This also produces heat which is used to generate electricity.

Natural sources of ionizing radiation include cosmic rays from the sun and outer space, and radioactive elements that occur naturally in the soil, rocks and building materials, such as concrete.

The risk from radiation exposure can be reduced by shortening the time of exposure, getting farther away from the source, and shielding or blocking the source. It is known that whole-body radiation doses of more than 10,000 millirem over a short period of time can cause a slight increase in a person's risk of developing some types of cancer years after exposure. In other words, if you were to receive a short term exposure of 11,000 millirem (11 rem), your estimated risk of

developing some type of cancer would increase by 0.05 percent.

During an emergency, if doses of radiation are expected to be greater than 1,000 millirem (an amount greatly below what would be necessary to see an increase risk of developing cancer), protective actions such as evacuations or sheltering in place would be directed. The purpose of these actions would be to keep people away from the radioactive materials that might be released during a severe accident.

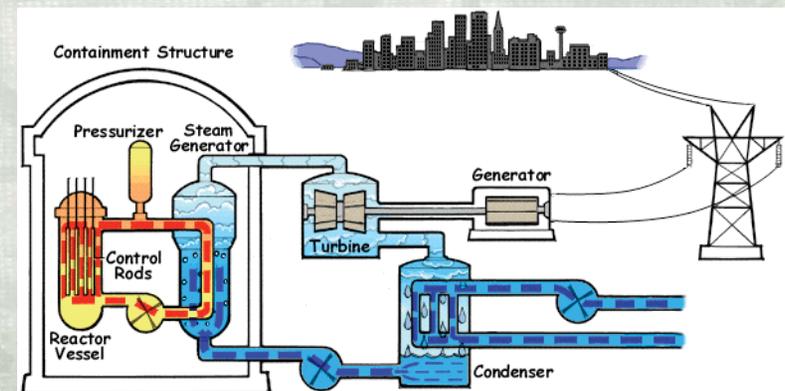

Diablo Canyon's design makes a large release of radioactive materials extremely unlikely. The safety systems at the plant are designed to control and contain the release of radioactive materials under accident conditions. The federal and state limits on radiation exposure established for the public, guide emergency planning for protective actions. The emergency plans for Diablo Canyon Power Plant and San Luis Obispo County are designed to minimize the exposure to the public by using the protective actions of evacuation and sheltering in place.

POWER GENERATION

THE PRESSURIZED WATER NUCLEAR REACTOR

In a pressurized water nuclear reactor, there are three separate and enclosed water loops. Within the first loop, water, under pressure to prevent boiling, flows through the reactor fuel core and is heated by nuclear fission. The heated water passes through the steam generator where it transfers its heat to the water in the second loop and is then pumped back into the reactor to be reheated. The water in the second loop boils into steam and rushes with great force into

the turbine where it strikes blades causing an attached shaft to spin. The other end of the shaft spins inside a generator, producing electricity. Within the third loop, cooling water, drawn from an outside source, condenses the steam after its energy is spent. The cooling water is returned to its source while the reconverted water is pumped back to the steam generator.

EVACUATION PLAN

YOUR FAMILY'S EVACUATION PLAN

Whether it is a flood, fire, earthquake, or an emergency at Diablo Canyon, disasters can and do happen. We cannot accurately predict when or where a disaster may strike, but we can prepare for them and help mitigate the consequences should one occur.

To be prepared for a disaster you need to know what the risks are, make a plan with your family, and build an emergency supply kit. If you have children, get them involved in the planning process. With your supervision, let your children select foods and small toys that they would like in the disaster supply kit. Getting your family prepared can seem like an overwhelming task, but someday it may bring a huge reward.

Although the information in this calendar is provided to help you prepare for a potential emergency at Diablo Canyon, much of the information is applicable to a disaster of any type that may occur in San Luis Obispo County. We urge you to read through this calendar, learn about the county's emergency plans and notification systems, create a family evacuation plan and assemble a disaster supply kit to help better prepare your family for whatever emergency or disaster we may face.

Complete, review with your family, then keep in a safe place.

1. _____ Protective Action Zone for our home (see map on page 11).
2. Our Child's School Relocation Center (see page 7)
or Daycare/Private School Plan: _____
3. _____ Carless Collection Point for transportation assistance nearest our home (see "Carless Collection Points" on page 6).
4. Friend or relative OUTSIDE OF THE COUNTY we will call if we are separated:
Name _____ Phone # _____
Address _____
5. Friend or neighbor who may need assistance during an evacuation:

6. Name, location and phone number of a friend or relative we will stay with OUTSIDE OF EVACUATED AREA until we can return home:
Name _____ Phone # _____
Location _____
7. Evacuation route (write down the major roadways you would use to leave the area). Note: For travel directions in an emergency, listen to the Emergency Alert System messages on a local radio or television station.
To the north: _____
To the south: _____
8. Important things to take with us (see evacuation checklist at right).
9. Before leaving home:
___ Close windows, lock doors, turn off air conditioning/heating.
___ Shut off systems that bring in outside air. These include furnaces, fireplaces, air conditioners, vents, and clothes dryers.
___ Turn off appliances (except refrigerators and freezers).

EVACUATION CHECKLIST

- ___ Eyeglasses
- ___ Medical supplies (prescriptions, first aid)
- ___ Potassium Iodide (KI) if available
- ___ Money (cash, checks, credit cards)
- ___ Important papers
(insurance, ID, bank books)
- ___ Blankets or a sleeping bag for each person
- ___ Warm/cool clothing for three days
- ___ Drinking water and special foods
- ___ Pets, pet needs (food, carriers, medications)
- ___ Special items for infants or elderly
- ___ Personal needs (washing, shaving, eye and dental care, sanitary, family photo albums)
- ___ Portable radio, flashlight, and fresh batteries
- ___ This emergency information and/or the current full size YP phone book
- ___ Extra set of car and home keys
- ___ Clothing
- ___ Sleeping bag
- ___ Other (list items) _____

BY SUBMITTING THIS VOUCHER TO RECEIVE POTASSIUM IODIDE TABLETS, I UNDERSTAND THE FOLLOWING:

- (1) The use of KI is voluntary; I am not required to accept it or use it.
- (2) KI is NOT a substitute for evacuation or sheltering in place, which are the most effective protective actions.
- (3) KI protects only the thyroid gland from radioactive iodine. In a radiological release, I would be vulnerable to possible exposure to other potentially dangerous forms of radiation.
- (4) I assume full responsibility for using KI. I will follow the Directions for Use on the ThyroSafe consumer package insert.
- (5) If I use this voucher I will receive two doses for each person for whom it is requested within a PAZ.
- (6) In the event of an emergency at Diablo Canyon Power Plant, KI will NOT be made available to the public at the pre-distribution locations or the evacuate reception centers.

EVACUATION ASSISTANCE CARD

This card is for independent-living individuals in the Emergency Planning Zone who would be unable to evacuate themselves due to a disability or medical need. Please fill out and return the card every year, even if you have filled out cards in the past.

Name _____

Residence Address _____

City/State/Zip _____

What is the nearest major cross street? _____

Telephone _____

Signature _____ Date of Birth _____

Protective Action Zone (see Emergency Planning Zone Map on page 11) _____

1. Check all that apply:

Hard of Hearing/Deaf Legally Blind Developmentally Disabled

Physically Disabled Bed Bound

Other _____

Please describe extent of the disability: _____

2. I use the following special equipment (*check appropriate boxes*):

Wheelchair Walker Service Animal TTY

Oxygen Other Specialized Equipment: _____

3. I live alone I have an attendant

I have a neighbor who will help evacuate me

Print attendant or neighbor's name, area code and phone number:

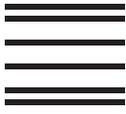

4. I would need specialty transportation: Yes No

If yes, check the appropriate box: Lift Van Ambulance

5. Please remove me from the list because:

I have made other arrangements for evacuation assistance

This information is considered to be confidential and will only be used for emergency purposes. For more information visit www.slocounty.ca.gov/oes. For questions or additional cards, call the the County Office of Emergency Services at (805) 781-5011.

GOVERNMENT RESPONSE

EMERGENCY PLANNING AND GOVERNMENT RESPONSE

The information included in this calendar is only a small snapshot of the emergency planning efforts that are conducted throughout San Luis Obispo County on a regular basis. The Federal Emergency Management Agency's (FEMA) Radiological Emergency Preparedness program assists state and local governments in the development and conduct of radiological emergency preparedness activities for areas with commercial nuclear power plants. San Luis Obispo County, in coordination with the cities, special districts, and emergency response agencies throughout the Emergency Planning Zone, plan, train and conduct exercises to ensure public health and safety can be protected should an emergency occur. These efforts are closely regulated and evaluated by federal officials through continuous reporting, inspections, and exercises.

Government officials and emergency response agencies need your help to ensure they are successful in their planning and response efforts. By thoroughly reading the information in this calendar and preparing your family, you will help mitigate the consequences should we be faced with a small or large disaster.
