**MITIGATION MONITORING AND**  
**REPORTING PROGRAM**

## **APPENDIX G MITIGATION MONITORING AND REPORTING PROGRAM PXP PRODUCED WATER RECLAMATION FACILITY**

This Mitigation Monitoring and Reporting Program (MMRP) was developed to ensure that mitigation measures included in the Final SEIR for the PXP Produced Water Reclamation Facility are fully implemented to reduce environmental impacts to a less than significant level. In addition, this MMRP complies with the requirements of Public Resources Code 21081.6, which requires the lead agency to adopt a reporting or monitoring program.

This MMRP is a comprehensive monitoring program capable of being implemented immediately upon approval of the project which is comprised of mitigation measures from the project's SEIR, implementation timing, and the agencies responsible for monitoring and verification. The MMRP will serve a dual purpose of verifying completion of the mitigation measures for the proposed project and generating information on the effectiveness of the mitigation measure to guide future decisions. However, the MMRP is dynamic in that changes may be made to the MMRP as specific information with regards to the monitoring efforts is provided.

The County will coordinate construction activities through direct contact with the construction superintendent (CS) and the supporting contractors. County staff will be responsible for oversight of construction activities to ensure compliance with mitigation measures and will also utilize environmental consultants to assist in supervising project construction.

### *OVERSIGHT OF CONSTRUCTION AND OPERATIONAL ACTIVITIES*

The mitigation measures adopted as conditions of approval by the County will be monitored prior to and during construction and/or operation to ensure implementation. The oversight of construction activities to ensure implementation and compliance with mitigation measures will be accomplished by County personnel, or by a third party specialist to serve as an environmental monitor (EM) for specific task (i.e., wildlife monitoring).

Prior to any project implementation, a pre-construction meeting will take place between the County, the construction contractor, and other individuals retained to assist in implementation of the MMRP. The goal of the meeting will be to establish the responsibility and authority of the participants and overall project procedures and schedules. Mitigation measures, which need to be defined in greater detail, will be addressed during the meeting.

The core of the MMRP is described in the following Implementation Table listing measures from the Final SEIR, its implementation, and the party responsible for verification.
