Response to the Draft Environmental Impact Report (DEIR) for the proposed Excelaron (Huasna Oil Field) project. Our property has two homes that are occupied and are the closest homes to the project road.

I'm concerned with the potential health issues that are not addressed by the draft EIR. We have a one year old grandchild living next door to the Mankins property and the trucks, oil spills, gas odors, chemicals that may find their way into the air and the soils.

I'm not confident we'll be able to use our land for walks and enjoyment with the risk from this project. How will the county's EIR assure me that my family will be save from the effects of this project?

Mitigations must be put in place to assure public safety!

A handwritten signature in cursive script that reads "Larry Floth". The signature is written in black ink and is positioned above the printed name and address.
