To John McKenzie, I chose Huasna Townsite as the place I wanted to spend the rest of my life because of the quite, peaceful and calm environment. At no point during the escrow process was I informed that the possibility of this incredible county treasure could be transformed into a noisy toxic oil field. I would have taken my money else where. My greatest concerns are the possibility of our water becoming contaminated, the intrusion of noise pollution, light pollution, and the safety of me and my neighbors from toxic vapors that may be caught in our valley due to an inversion issue we have. The fact that there is no realistic way to transport the oil out of the valley leads me to ask you to please recommend against this project. Thank You for your time Anna Gabriel
