Comment: Light pollution from Pad 2 especially constitutes a Class I impact - most notably during drilling and re-drilling. Additionally our residence is directly across the street from pad 2 at close to the same height visually. Our home is not identified as severely impacted by noise/light from Pad 2, but yet we are sure it will be.

Huasna is very dark and very quiet. Please feel free to have your environmental consulting firm contact us about Class I impacts

Signature on Pad 2
