Mr. McKenzie,

I have been a resident of Arroyo Grande for six years, and I ride a road bike about 1000 miles a month. Just about the best ride in the area is Huasna Rd. When I see heavy equipment on Orcutt or any other road that has a bike lane I do not have any problems with then, but on Huasna Rd. is narrow, hilly and lots of turns, some of which are hairpin turns. I cannot fathom how a large truck of any type could negotiate that road without endangering bikers and cars. I know we need more oil, but unless you have another road for entry and departure I cannot say anything except this project is a really bad idea for the ambiance of the area and the safety of riders and cars. Thank you for your time, Kenneth Price 805-489-9779
