3427 Miguelito Court
San Luis Obispo, Ca 93401

Concerning your permit with Howard Mankins and the County of
San Luis Obispo.

I have heard and seen your intentions at your meetings on preparing to drill for oil on the Mankins Ranch Mountain, right behind my house, and other facilities on the property. As you are aware of the fact, that Mankins, and Rhoades, have a fence property line going across the center of this mountain, where Mankins owns the top side and Ben Rhoades owns the bottom side of said drilling sight of said mountain.

I have 100% mineral rights, on this mountain, which I will not allow any slant drilling, sucking out my oil. I also have a great amount of water, which I use for irrigation of vegetables, fruit, etc. I will not allow you to disturb my water and my present livehood. Anything can, and will, go wrong, causing a large amount of damages which I will hold you all involved with this project, responsible for. 1, Oil Company. 2. Mankins, 3. San Luis Obispo County.

Oil is good, but water is better which we can drink, use for irrigation etc. We can not use oil for drinking or irrigation etc. However, it's very well possible, that many of the problems can be worked out to everyone's satisfaction.
