Response to the Draft Environmental Impact Report (DEIR) for the proposed Excelaron (Huasna Oil Field) project.

I live across the street in direct view of the project site – I am intimately impacted by this project and the resulting noise and road traffic. I'm also very concerned about property values in the Huasna Valley – our property will have be worthless with the approval of this project.

In looking at the DEIR, there is a huge increase in traffic on Huasna Road and Huasna Townsite Road throughout the project especially way back in the valley where we live. Compared to our normal day-to-day traffic – this project will greatly increase the noise, dust, and traffic safety near our home.

It is my opinion that the DEIR needs to look in depth at the impact of so many additional trips and vehicles into this small, rural valley. It is my opinion they need to look again at this critical area.

I also feel the EIR should require that all traffic (project related) should be routed through the Porter Ranch Road.
