Comment: Excelaron is already breaking out of some of the recommendations of the EIR. Example: They refer to the odor nuisance as not a significant issue because there is very little natural gas in this formation. Odors are caused by HYDROGEN SULFIDES at 5-40 parts per billion. That is what makes Price canyon smell. Don't do this to another valley in SLO county! Another example: traffic. Exc. says they will take tankers out back road, but what about drill rig & tanks, drilling crews, operations staff, propane trucks, construction equipment???. How many extra trips on Huasna Road???
