Dear John McKenzie,

Please find the enclosed letter with my comments to the draft EIR for the referenced project. I apologize for sending this via e-mail but I have been on extensive travel for the past month and have therefore had limited time to research this issue and get a letter to you via mail. I will follow this e-mail with a hardcopy of this letter to you this week.

I know your job is very difficult and it is possibly beyond the resources you have at your disposal to completely research the validity and adequacy of both this permit application and the draft EIR, but I urge you to investigate at least some of these issues, and I trust that what you will find will cast doubt on many of the other claims being made. Please also realize that the environment of this valley, and the lifestyles and even the livelihoods of its many residents will be determined by the decisions that you and the officials of this county make in the coming months. Please exercise due diligence and call upon us as needed for assistance. We would like nothing better than to have all the facts on the table so that the right decision can be made.

My sincere thanks,  
Kent Zammit
