Subject: CREDO Activists comments on Phillips 66 proposal (3 of 3)

Mr. Murry Wilson
SLO County Planning Department
RE: Phillips 66 oil train proposal
Enclosed are 12,255 individual public comments collected by CREDO Action urging the San Luis Obispo County Planning Commission and Board of Supervisors to reject the Phillips 66 oil train proposal. Individual comments may differ throughout, although many read as follows:

“I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of California of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California.”

Please contact me if you have any questions about the attached comment submissions.

Sincerely,

Elijah Zarlin
Campaign Manager, CREDO Action

The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of California of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California." I urge you to deny Phillips 66 permission to expand any operation that involve the processing of tar sands until - train tanker cars containing oil are proven to eliminate the chance of serious harm to Californians and their communities, - Phillips 66 pipeline incidents/accidents are consistently below the lowest level since 2004 and - Phillips 66 oil processing facilities can consistently reduce all types of pollution to the lowest levels since 2004

Sincerely,

Jerry Tobe

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

martha Schwartz

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Mary Buncom
2835 Topaz Avenue
Simi Valley, CA 93063-2156

Mr. Murry Wilson
SLO County Planning Department

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Patrick Adiarte
5300 Knowlton St #5
Los Angeles, CA 90045-2030

Mr. Murry Wilson
SLO County Planning Department

RE: Reject the Phillips 66 oil train proposal

Expansion of the Phillips 66 Santa Maria and Rodeo refineries is a bad idea. We need to become less reliant on fossil fuels, not more so.

Sincerely,

Richard Boyer

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Lisa Rothman

Mr. Murry Wilson
SLO County Planning Department

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Susan Piercy

Mr. Murry Wilson
SLO County Planning Department

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Mark Raymomd

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Peter Draves

RE: Reject the Phillips 66 oil train proposal

Have you no memory of the oil spilled in Los Angeles INNER CITY just this May? 10,000 gallons sprayed kneedeep from a 20 inch pipe owned by Plains All American Pipeline ~ which runs from Bakersfield to Texas. "A thousand pounds of pressure behind that pipe, and we had approximately 20 feet of oil spraying in the air," Los Angeles City Fire Captain Jaime Moore told CBS radio KNX. The dramatic increase in crude oil shipments around the United States and Canada, often on 100-car trains, has led to several major derailments and fires. Valero Refining Co. in Benicia and Alon USA in Bakersfield are proposing to transport crude oil twice a day on trains into their facilities. "SO, I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Mr. Murry Wilson
SLO County Planning Department

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Ann Tubbs
246 2nd St.
San Francisco, CA 94105-3111

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Alexa McMahan

Mr. Murry Wilson
SLO County Planning Department

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Muiz Brinkerhoff
1610 Peterson Lane
Santa Rosa, CA 95403-2365

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Julie VanTilburg
602 Carlotta Circle
Pinole, CA 94564-2358

Mr. Murry Wilson
SLO County Planning Department

RE: Reject the Phillips 66 oil train proposal

“As a Santa Barbara County resident I am writing to oppose Phillips 66’s expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California.”

Sincerely,

Kevin McClintock

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Denise Smith
222 Green Valley Rd.

SLO County Planning Department

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Chris Baral

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Anne Spesick

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Mary Hughes

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Janice Morrell

Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California." We haven't really needed Oil and Gas since the 1980's in the light of wind and solar. Stop this madness, and start working towards sustaining life as we know it, instead of working towards our extinction. You have a choice, defend the interests of people and future generations, or serve the greed of a few wealthy individuals and families who have no regard for human life, or preserving our ecology. Greed is not a virtue, nor is your lust for power.

RE: Reject the Phillips 66 oil train proposal

There is no more time left to consider using fossil fuels at all now. The time is up. We need sustainable, safe energy and jobs that go with building it. There IS ENOUGH MONEY to do this. It's called WAR MONEY and it's sitting in the Pentagon. It's sitting offshore in cheating corporations accounts. "I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Ingrid Salamanca
455 Serento Circle
Thousand Oaks, CA 91360-1561

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

George Thorward

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

jan Lochner

RE: Reject the Phillips 66 oil train proposal

I oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. This plan represents: -- thwart to the quick transition to clean energy sources -- catastrophic threat to communities and major population centers in the oil train blast zone -- increases toxic air pollution in refinery communities -- substantial increase in global warming pollution -- exacerbation of California's crippling drought and massive wildfires. I expect California's public officials to strongly support a clean energy future in California--not promote or enable dirty energy to continue.

Sincerely,

Ms Chris OMeara Dietrich

RE: Reject the Phillips 66 oil train proposal

Are we so asleep at the wheel in California and so vision limited in big picture thinking that we continue to allow foreign companies, in the foreground and background, piece by piece, to shift all the risk and threat to life and future way of life in our country, state and communities for "their" profit? What you do locally now will have a much wider and longer term affect than you evidently imagine since its even being considered. As a caring, concerned, Californian with generational family here, I ask you to please consider the present and future consequences of this decision and OPPOSE these Phillips 66 refinery expansion plans in California. "I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of California of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Madge Torres
2505 Sombrosa Place

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Lela Nishizaki

RE: Reject the Phillips 66 oil train proposal

As to the concern of the Phillips 66 oil spur controversy, there will NOT be any of the "Bakken" oil delivered to the Santa Maria plant on the Nipomo Mesa. The oil they propose to bring in is the same oil that is brought out of San Ardo, CA. and runs through our great county of San Luis Obispo. This oil is NOT the explosive type that is the Bakken type. I am a retired railroad Conductor (42 years) from this county and ran many, many oil trains out of San Ardo on through to the Los Angeles basin. From experience, I can safely tell you there is no dangerous hazard running this train through our county. Once, while in charge of the oil train, it separated due to a faulty coupler. As the train came apart the over head hose (approx. 14" in diameter) broke and oil was spilled to the ground. it is not flammable and all it did was lay on top of the ground until crews came out to clean up the oil. AGAIN, the oil for Phillips 66 plant an the Nipomo Mesa IS NOT flammable.

Sincerely,

Virlon Smoot

RE: Reject the Phillips 66 oil train proposal

California does not need any tar sands developments. "I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Jim Witoszynski
3420 South Sepulveda Blvd. #402
Los Angeles, CA 90034-6076

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

e Mason Mason

RE: Reject the Phillips 66 oil train proposal

“The U.S. is continuing to expand infrastructure for oil and gas extraction at a time when the country should be reducing that infrastructure. The country should be pushing hard for renewable, clean energy systems and related infrastructure. We are burning valuable petroleum products on wasteful uses (home heating, cars) which fuel can be replaced with renewable energy and also with massive energy conservation programs (like high mileage cars, solar and electric cars). Climate warming is killing the planet, but also, we should drastically limit the amount of petroleum we extract in any given year because oil is highly useful and rare and limited in amount, and oil is not easily replaced in certain types of manufacturing. So why are we wasting petroleum on cars and home heating? Oil is a limited resource; it will run out and will NOT be replaced by decayed and compressed dinosaurs and ancient forests. WE must use petroleum sparingly and wisely so that it is available for careful use by future generations. I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of California of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California.”

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Sheldon Warren

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Susan Fujimto

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Kenna Elizabeth
P.O. Box 116
Coloma, CA 95613-0116

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Wendy Hamilton

RE: Reject the Phillips 66 oil train proposal

I am deeply concerned about the proposed crude-by-rail project at the Phillips 66 Santa Maria Refinery. This project presents significant and unacceptable risks to communities across California. You would really take the risk of ruining yet more of California's environment? And, San Luis Obispo is one of the most beautiful counties in California. We need to tell Phillips 66--and all big Texas oil companies--to stay in Texas. Already, the Keystone XL spur that ends in Port Arthur had to be shut down because the area began experiencing earthquakes. Texas oil knows better—they just don't care. Seriously, does it make any sense to allow "significant and unavoidable" levels of air pollution, including toxic sulfur dioxide and cancer-causing chemicals? And, because these trains would be traveling through agricultural areas of our state, it raises the risk that our arable lands will be polluted beyond saving. California is the primary supplier of agriculture in the country. Would you really subject our state to this potential--and probably certain--deleterious effects to our state's environment? You are not making this decision solely for San Luis Obispo County: you are doing this for every county that the proposed train will pass through. And, you will cause irreparable damage to our state's natural and agricultural environment. It's been bad enough that beautiful Monterey County is being polluted daily by the toxic waste bi-products of fracking. Now, there's the potential of increased violation of our state's environment--and its agriculture from the toxicity arising from these oil trains. I do not want oil trains running through my--or anyone else's--community. Send a message to the Phillips 66 executives their Houston headquarters that they can find oil in Texas or they can get their act together and create sustainable energy sources. We don't need their plans to produce dirty fuel that will be sold elsewhere and take jobs out of California. Worse still is that once these oil trains finish polluting our state, Phillips 66 will leave your county decimated and ugly. Anyone with any sense would stop this. The San Luis Obsipo Country environment will be irreparably damaged and allowing this monstrosity will not only damage your county, but every single county the train crosses. If you permit this in San Luis Obispo, you are giving other counties no say as to whether they want this train to traverse their communities. Think about it: the number of crude oil unit trains--and we don't know how many counties through which this poison traverse--obviates their say in whether they want those trains coming through. I justifiably concerned about the toxic air, land, and water emissions that will result from these shipments. In its latest environmental review, Phillips 66 even admitted that its proposed oil train facility will create "significant and unavoidable" levels of air pollution, including toxic sulfur dioxide and cancer-causing chemicals. The report cites increased health risks -- particularly for children and the elderly -- of cancer, heart disease, respiratory disease, and premature death. Putting this train through is unsafe. We have no way to prevent catastrophic environmental damage. Even if Phillips 66 does try to reassure the board members that they will closely monitor the train, I would argue that we need to remember the Exxon Valdez, the Gulf Oil Spill, and many other such catastrophes where communities were assured that they had everything under control and spills would not occur. Phillips 66 in no way can guarantee the safety of these trains. They have stated

CREDO Action

as much publicly. That should concern each of you. Communities and emergency responders along the rail route are not prepared for these heavy, dangerous trains. Their current safety standards are not adequate to protect the public. The recirculated draft EIR dangerously misinforms the public because it uses outdated data and does not adequately assess the risks of an oil train disaster involving an oil train carrying millions of gallons of explosive crude oil. The EIR must also fully analyze the potential worst-case scenario of a spill near each of the many watersheds crossed en route to the Santa Maria refinery, including the San Francisco Bay-Delta watershed and California's central coast. A derailment near a river, stream, reservoir, or above a groundwater aquifer could contaminate drinking water for millions of Californians. I cannot believe that any of you would want the legacy as a board member bent on destroying the natural beauty of your county, the San Francisco Bay, and the Central Coast. These are predominantly agricultural communities through which this train will pass. During a time of extreme drought, SLO must not approve this project and create contamination risk for the rest of our state. We don't need our state, the number one provider of agriculture to this country, have its arable lands polluted. Phillips 66's proposal could well destroy much of our farmlands. And, that's simply unacceptable. The climate impacts of Canadian tar sands crude must also be taken into account. At every stage of the mining, transportation, and refining process, tar sands are more carbon intensive than any other source of oil. Bringing tar sands to California will undermine the state's efforts to be a global leader addressing climate disruption. Finally, I urge the planning department to examine the Santa Maria and Rodeo proposals as a single project. The proposed oil train terminal in Santa Maria is linked by pipeline to the Phillips 66 refinery in Rodeo, CA. Phillips 66 is proposing to modify these facilities to allow them to refine tar sands, thus creating more toxic air and water pollution for families along the rail line and near the Santa Maria refinery. San Luis Obispo cannot approve the Santa Maria project in isolation. It affects not only our state, but the entire country because it will cause irreparable damage to our farmlands. I urge each of you on the San Luis Obispo County Planning Commission and Board of Supervisors to reject the Phillips 66 proposed rail spur. This project creates significant, unavoidable, and unnecessary risks for our communities and our climate. Each of you have a chance to send a message and set a precedent that California will not tolerate our beautiful state be polluted by outside, Big Texas Oil cartels.

Sincerely,

RE: Reject the Phillips 66 oil train proposal

I am writing to oppose Phillips 66's expansion plans for the Santa Maria rail spur and terminal and the Rodeo refinery. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone. The project would increase toxic air pollution in refinery communities and will increase global warming pollution, exacerbating the threats to California of crippling drought and massive wildfires. Californians depend on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and the future of our state. We are counting on you to vote against this expansion plan.

Sincerely,

Mary Ames

Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California." Tar sands are a huge mistake. No one should have even gone this route. Transporting them through California and the Bay Area is insane as the Bay Area is very crowded with 7 million people and extremely polluted as it is. California is the world's tech center. Surely by now we should be leading the nation in alternatives. We, in California, are suffering enough with such a serious drought and empty or contaminated aquifers from tar sands. This insanity must stop. Let it stop here.

Sincerely,

Rachel Robson

RE: Reject the Phillips 66 oil train proposal

"I oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries because they pose a catastrophic threat to all Californians - not just the 5.5 million Californians living in the oil train blast zone. More oil has spilled from train derailments in 2013 than in the past four decades, and now Phillips 66 proposes to increase the risk of spills, explosions, and contamination with even more oil train traffic - daily round trips of mile-long trains carrying explosive tar sands oil that emit "significant and unavoidable" toxic air pollution. Phillips 66's expansion plans will not just affect refinery communities; they will substantially add to global warming pollution, affecting all of California by way of crippling drought and massive wildfires. We Californians depend on you, our public officials, to protect our health, safety, and future from the multiple threats posed by the Phillips 66 fossil fuel expansion plans.

Sincerely,

Laura Zucker

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Jennifer Ammon

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Debra deVictoria
22922 Avenue San Luis
Woodland Hills, CA 91364-2825

Mr. Murry Wilson

RE: Reject the Phillips 66 oil train proposal

"I am writing to VIGOROUSLY & ADAMANTLY OPPOSE Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a CATASTROPHIC THREAT to communities and major population centers in the oil train blast zone, will increase TOXIC AIR POLLUTION in refinery communities, and will substantially increase (SCIENTIFICALLY-PROVEN/BACKED!) GLOBAL WARMING POLLUTION, exacerbating the threat effecting all of california of crippling DROUGHT and massive WILDFIRES. Californians are depending on our public officials to STOP dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Mr. Murry Wilson
SLO County Planning Department

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

M Morales
any

RE: Reject the Phillips 66 oil train proposal

I personally knew two people killed by a wrecked train carrying chemicals. They were a young pathologist who had just finished his military commitment and his wife. His two young children's lungs were badly damaged. We certainly don't need any more tragedies like this! "I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat affecting all of California of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Steve M Cross

RE: Reject the Phillips 66 oil train proposal

The proposed plan of transporting the dirtiest crude oil by train through California is not only irresponsible in light of so many toxic spills from pipeline leaks and explosions already. It speaks to a callous disregard by the Company toward peoples' health and lives and the environment for generations to come. The Company's blatant, wreckless and sole focus on increasing profits at all cost should be insulting to any permitting agency. Taking such high risks and allowing this project would be insane

RE: Reject the Phillips 66 oil train proposal

I am writing regarding Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. For many years I have heard elementary school teachers in Richmond tell of oil smells in the air affecting disadvantaged students and disrupting the school day, and oil companies denying there has been any leak - this has at times extended to media coverage that purposely misled the public. If leaks are affecting the community, they also affect oil workers, and the history of the general laissez-faire attitude of the industry and of legislators is of serious concern where long oil trains will be running. I am very concerned, and I would like refineries and oil trains to be held to the same standard you would expect, were your grandchild attending school next door to a refinery or an oil train blast zone. When I was teaching in a classroom, there were times that there was a fossil fuel smell, and management was able to mitigate the situation, and it's unacceptable that refineries are not held to the same standard. I would expect a limit on the number of train cars and train frequency. You know this is a national security risk.

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Skye Patterson
145 Calvert Ct.
Ukiah, CA 95482-4678

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. I live in a community through which five trains a WEEK will be passing, if this is approved, and the rail line is immediately adjacent to our ELEMENTARY SCHOOL! Oh, did I mention the tracks are in such bad shape that a freight did derail here a few years ago? (Google "Aromas derailment") Fortunately, it wasn't carrying hazardous materials, though if this plan is approved, the next one could very well be. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat affecting all of California of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Robert Kutter

Mr. Murry Wilson
SLO County Planning Department

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Andrea Picchi
3787 Brookdale Blvd
Castro Valley, CA 94546-2013

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Stan Fiisher
1948 Eucalyptus Road

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Amanda Percy
1219 S. Chavez St.
Burbank, CA 91506-3315

RE: Reject the Phillips 66 oil train proposal

I oppose Phillips 66's plans for expanding the Santa Maria and Rodeo refineries. The plan will increase air pollution in communities where the refineries are located. This will not only damage people's health, it will also harm the health of the environment. Rather than facilitating this plan, our public officials should be working to stop the expansion of fossil fuel use, which poses many threats to health and safety in California.

Sincerely,

Brad Currier

RE: Reject the Phillips 66 oil train proposal

"I live in Sacramento, CA not far from the main railroad tracks that run through the city center. I am alarmed that my city could experience a destructive train accident with crude oil tankers. I have asthma that worsens as the air gets more polluted. I can't understand why we are still dependent on fossil fuels given what we know about global warming. For these reasons, I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of California of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Karol A thes

RE: Reject the Phillips 66 oil train proposal

Nada Enchilada! When is enough enough! The skeletal rattle of a corpse in the throes of death~don't take our communities with you. I live by Rodeo, I don't see any Phillips executives living anywhere nearby!!! Run those train lines through your own damn back-yards; let your spouses and kids breathe the poison. What feckless wonders our state and local lapdogs.....Like Fannie Mae Hamer, "Sick and tired of being sick and tired...." Doesn't matter what sex, race, ethnicity the official, "Show me the money!!!!" Craven..... "I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Mr. Murry Wilson
SLO County Planning Department

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Barbara Hardwick
222 Calle de Arboles
Redondo Beach, CA 90277-6604

RE: Reject the Phillips 66 oil train proposal

I'm opposed to transporting tar sands through my community because we don't stand to gain much and are only threatened by the possibility of a spill. Additionally, tar sands having end points like refineries in California only speeds up extraction in Canada, which has been degrading one of the last intact forests.

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Marsha Holmquist

RE: Reject the Phillips 66 oil train proposal

Please, please, please don't bow down to this craziness. It's already hard to breathe in the areas of this project. It is unconscienable to think of making it worse. Therefore, I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California.

Sincerely,

Merrily Pence
43300 Airport Rd, Littleriver, Ca,
Little River, CA 95456

RE: Reject the Phillips 66 oil train proposal

I am writing to very strongly oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat of crippling drought and massive wildfires affecting all of California. We Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California. Extraction of toxic tar sands oil not only creates massive environmental damage wherever it is extracted, but tar sands crude oil is much more easily explosive in an accident than other crude oils. There is a small town in Quebec in which 37 people were killed by fire and explosion from a derailed train that was carrying tar sands crude oil extracted by fracking. THE DANGER IS BOTH REAL and PROVABLE. Do your real job by protecting human lives, health, and our environment.

Sincerely,

Bruce C. Grant

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Casey Smith

Mr. Murry Wilson
SLO County Planning Department

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Nora Lyman
2325 McKinley St., At. 2
Berkeley, CA 94703-1734

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Matt Aguilar
120 N. La Reina Cir
Anaheim, CA 92801-6368

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Dennis Love

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Dale Powell
146 West Broadbent Drive
Riverside, CA 92507-4755

SLO County Planning Department

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Jason Daniel Patent
555 Pierce St. #1338
Albany, CA 94706-1010

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Alicia Mathews

RE: Reject the Phillips 66 oil train proposal

Hello: How much of a threat this poses to public health, the environment, and the safety of people in all the affected communities has not been adequately analyzed and addressed. Please do not allow this to go forward without comprehensive review of all the potential impacts. Thank you, Ken White Richmond, CA

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Rosalie Preston

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Angela Santopietro
1310 Nordahl Road Escondido CA

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Lucas Lenhart

RE: Reject the Phillips 66 oil train proposal

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Hod Gray
521 Arroyo Avenue
Santa Barbara, CA 93109-1402

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Wendy Tsien

Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California." I live in Sacramento, CA and only found out recently that the oil trains run 3 miles from my house. Sacramento stops have been moved or will be due to improper permits. So I absolutely oppose Phillips 66 from expanding. The absolute minimum would be to build new oil tanker cars with considerable safety measures I.e. double layered sides.

"I am writing to oppose Phillips 66's expansion plans for the Santa Maria and Rodeo refineries. The plan represents a catastrophic threat to communities and major population centers in the oil train blast zone, will increase toxic air pollution in refinery communities, and will substantially increase global warming pollution, exacerbating the threat effecting all of california of crippling drought and massive wildfires. Californians are depending on our public officials to stop dangerous fossil fuel expansion that poses so many threats to our health, safety and future in California."

Sincerely,

Adriana Chavez
