RE: Phillips 66 Proposed Project  
DATE: Feb. 2, 2016

Planning Commissioners,

As a Carpinteria resident of 25 years, who lives 5 minutes from the railroad tracks, I am strongly opposed to the expansion of the Phillips 66 project and the transportation of crude oil along the railroad tracks. It may have serious repercussions on the health, public safety, environment and economy of our communities, the state of California and our nation. Even the possibility of error is enough justification to reject this project. The future of our state depends on your decision.

Please consider these factors and the recommendation of staff and deny this project.

Thank you,

Amrita M. Salm, Ph.D.
