Subject: oil trains

Dear Commissioners and Supervisors:

I'm sure my communication is not unique in light of the derailment on the Columbia River.

How can you not protect us, the public, from well-known disasters, documented risks, in all good conscience, in light of your sworn duty? Do you think it's not going to happen here because we're "special?"

We are not to be weighed against profit, we are not bets to be hedged. We are those to whom you are charged to protect and serve.

Sincerely,
Betty Winholtz
Morro Bay
