Subject: Please Stop the Oil Trains

We respectfully urge you to deny the oil trains in San Luis Obispo County. Too many oil train accidents/catastrophies have already occurred, illustrating the danger of shipping oil by rail. The reward of job creation in favor of approving the oil trains is insufficient to the risk involved. Please protect this beautiful county, which we call home and which others call a place of respite, from the oil train business. Please protect our county from mishaps such as the most recent one in Oregon. Please protect our health and well being by eliminating the use of rail transport of oil.
