Question or Comment	<p>Dear San Luis Obispo Planning Commission, I want to go on record against the Phillips 66 Santa Maria Refinery Rail Spur Project for its very significant risk to public safety/health and environmental protection. I believe the trains, that will carry the dangerous toxic oil, will depend on rail infrastructure and transportation containers are not designed with a large enough of a safety margin to prevent a devastating accident. The risk is way to high. These trains will go right through our communities. In Templeton, my town, they literally will travel less than half mile from our schools, houses, businesses, parks, open space, government buildings, etc.. We have to have the courage to acknowledge this and keep our heads out of the tar sands. Powerful and very tempting arguments are made that these will keep or create critical jobs. What about the critical jobs and communities polluted if a derailment or oil spill occurs? This could negatively impact many more jobs for decades. Please vote no for this project. Thank you! David and</p>
