Subject: oppose hazardous crude by train

As a Berkeley resident who lives not far from the tracks over which the 250 train loads of hazardous crude will pass each year i urge you to oppose permission for this. The oil industry should not even be considering putting residents on this densely part of California at risk in order to secure their oil profits. We know the rail road cars are not up to the job of carrying heavy crude and since there is already a record of accidents from these kinds of shipments, it would be criminal to allow these trains to pass through our communities.
