Subject: MRWG Statement in response to April 15th Planning Commission Deliberations

Hello Ryan,

Attached is a letter from MRWG Technology Committee in response to questions and commentary at the April 15th Planning Commission meeting. It is our understanding that public comment is only re-opened at the direction of Legal Counsel and that such opportunity would be associated with new facts and/or information that is changed materially. We respect the process. In attending the deliberations, MRWG has observed and listened to communications that are concerning to us. We seek all available avenues to provide MRWG clarifications as input to the Commissioners.

We request that the attached letter be circulated to the Commissioners, posted to the Planning Department web-site as part of the public record and that any Planning Department staff member, project Consultant or Commissioner be encouraged to contact MRWG with any questions about the submitted information.

Thank you for your professional attention to MRWG communication and requests.

Eunice
