| Comments or questions: | I planned on speaking today, but there were too many people. Here are my prepared "BLAST ZONE". Any project with a Blast Zone involved, is obviously NOT beneficial. Hospitals also lay along the proposed train route. Knowingly placing our children in hospitals, for the profit of Philips 66 is deplorable. With the current gas leak in LA, the time that this Country, this State and this Community start putting people first, instead of profit, staff has rightly recommended denial of this controversial project. In their report the concerns about the health, safety and welfare of the public. This project would be a significant unavoidable environmental impacts including, but definitely not limited to in SLO and the rest of the State at risk. Clearly it is not worth the risks. It threatens not just tourism, agriculture and nature as well. You are well aware that the community is by no means outweigh the risks. We don't want to be the next corporate created disaster. Protect you for your time. |
