Subject: Oil Train Passthrough

To Whom It May Concern,

We received a letter in the mail informing us on a plan to start shipping oil over over the rails that are adjacent to our home at 70 Ryland Park Way. We are about 50 feet from the train and can see and hear the trains as they go by. My wife, 2.5 year old daughter, and my unborn daughter due literally tomorrow all strongly appose transferring toxic chemicals and oil less than 50 feet from my daughters's bedroom window.

I know other residential units keep going up around this neighborhood, and it really will negatively impact health, property value, and peace of mind. It has truly has been proven, and Phillips 66 even admits that oil train facilities and trains create "significant and unavoidable" levels of air pollution (350siliconvalley.org). They speak of cancer causing chemicals, are you kidding me?! This will no doubt lead to really really tragic problems...all for what, dirty energy?! In this day and age of renewable clean energy, how is this even a proposition.

This is really scary, and would be a disaster for my family and community.

Please don't allow this to happen, we beg you,
Kevin Weiler
