

Stop the oil bomb trains!
Marguerite Borchers to: rhostetter

01/30/2016 08:32 AM

Dear Mr. Hostetter,

I am an online elderly activist who signs petitions and supports Sierra Club and EDC. I gathered signatures on a petition to put the initiative on the ballot in 2014 to halt fracking in Santa Barbara County. Unfortunately, it was voted down because of the lack of available information at that time in regard to the harmful effects of fracking.

I hear the haunting sound of the train's discordant whistle throughout the day and night. It's something I can count on and reassures me. Please don't allow oil to be transported on trains because that would alter that iconic sound to a very frightening one.

No to Phillips 66.

Stop this project and protect environmentally sensitive habitat, air and water quality, and the health and safety of our communities.

Margie Borchers,
Santa Barbara, CA
