Dear County Supervisors. We writing in opposition of the proposed Phillips spur in SLO. As protectors of SLO and its surrounding coastal environment, We ask you to deny this request and have Phillips do more research and come up with an alternative to rail, such as future pipelines. Certainly, at a time that the world is flush with oil and when our coastal environment is so fragile, it appears to be against the good of all citizens to allow this project.

Sincerely,
Michael and Patricia French
