Dear Decision Makers,

On January 25, 2016, a staff report from the Planning Commission of San Luis Obispo County recommended DENIAL of Phillips 66 proposal to deliver by oil train and refine tar sands oil at its refinery in Nipomo. Please vote to deny this dangerous project.

The Phillips 66 oil rail transport and storage project would permit millions of gallons of toxic crude oil to be shipped by rail through California cities, from Chico, to Sacramento, through Bay Area cities and San Jose, and southward to the Santa Maria Refinery in Nipomo. Along its route for the life of the operation, the project would subject millions of Californians to risks of derailments, spills, fires, and

explosions. The report cited 32 reasons to deny this project. Please take their recommendation and vote to deny this crude by rail proposal.

Respectfully,

Nikki Sachs
