Subject: Fw: Oil train derails Oregon's Columbia River Gorge | KIRO-TV

Hi Ramona - I have maybe 20 or so emails I have this morning that I need help with saving in the folder with the naming convention as PDF and printing for our hard file..... I want the PC to get all these so we need to get them all on the web where the other letters are and let the PC know in an email that we got about 20 or so new emails. These need to be in the record for the project.

I assume we will be getting a lot more of these and I just talked with Ida and she is also going to forward emails for the record which are coming into the general department email so please do the same process with all emails from Ida as well so we can post them on our spot on the web that we have been doing (this is really really important).

Thanks! See below- PS remember to pdf bot the email and any attachment within the email under the naming conventions!

Subject: Oil train derails Oregon's Columbia River Gorge | KIRO-TV

This is on the Union Pacific mainline and this could be anywhere on the line through SLO County. Please forward to the Planning Commission as Three of the Five said there is no Risk with the Crude Tank Bombs and Phillips 66 Crude by rail.

You can't mitigate a derailment. So again, what is the over riding consideration supported by facts that this Phillips 66 project should be approved.
